

ARUN ARUNACHALAM

Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

Operations-focused Technology Executive with 17+ years leading large-scale platform transformation, enterprise infrastructure modernization, and global engineering operations across complex, high-availability environments. Proven track record directing distributed engineering teams across multiple geographies while delivering measurable cost reductions, performance improvements, and operational excellence at scale. Combines deep expertise in cloud-native systems, data engineering, and AI-enabled platforms with executive stakeholder leadership to drive strategic initiatives from concept through execution. Adept at managing large programs, optimizing facilities and systems infrastructure, and ensuring regulatory and compliance standards across mission-critical operations.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Global Engineering & Operations Leadership | Enterprise Infrastructure Modernization | Program & Project Management | Cloud-Native Architecture (AWS, Kubernetes) | High-Availability Systems (99.97% Uptime) | Cost Reduction & Performance Optimization | AI & GenAI Platforms (RAG, Agentic AI) | Event-Driven Systems (Kafka) | Data Engineering (Spark, Databricks, ETL/ELT) | Regulatory & Compliance (SOX, FRB, FINRA, SEC) | Executive Stakeholder Management | Agile & ITIL Delivery | Strategic Planning & P&L Ownership

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Directed global engineering teams of **30+ engineers across US, UK, and India**, overseeing end-to-end operations, delivery, and infrastructure for mission-critical platforms
- Led **\$8M enterprise-scale platform transformation** delivering **40% performance improvement** and **30% cost reduction** across trading and data systems supporting **\$1T+ daily processing**
- Scaled and maintained high-availability infrastructure from 10 to **50+ systems** with **99.97% uptime**, ensuring continuous operational reliability
- Modernized legacy infrastructure into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), reducing operational overhead and improving system resilience
- Drove **15% engineering velocity improvement** through process optimization, tooling, and Agile delivery practices
- Implemented AI-assisted development workflows and ML-based anomaly detection to improve operational intelligence and reduce incident response time

- Ensured regulatory and compliance standards (FRB, FINRA, SEC, SOX) across all mission-critical systems and infrastructure

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Managed consolidation of complex risk and analytics systems, contributing to ~\$2B capital efficiency through infrastructure rationalization and platform optimization
- Built and operated real-time pricing and analytics platforms for structured products and mortgage trading, ensuring high availability and performance at scale
- Led cross-functional teams through multi-year modernization programs, coordinating across engineering, operations, and executive stakeholders

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications, managing full lifecycle from design through production operations
- Introduced CI/CD practices that reduced release cycles from monthly to weekly, improving operational agility and reducing deployment risk

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) to automate operational workflows and accelerate engineering delivery
- Applied ML for anomaly detection and operational intelligence across large-scale infrastructure environments
- Driving AI-assisted SDLC workflows improving delivery speed, quality, and team productivity

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, global engineering & operations leadership (30+ engineers), P&L ownership, strategic planning, program management, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance **Infrastructure & Architecture:** Cloud-native architecture (AWS, Kubernetes), enterprise infrastructure modernization, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime), cost optimization **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
