Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

Accomplished Applications Development Technology Lead with 17+ years of experience architecting and delivering large-scale, cloud-native platforms across capital markets, trading, and enterprise data systems within global financial institutions. Proven track record driving full-lifecycle software development — from design through deployment — while leading global engineering teams and managing complex, cross-functional programs aligned to business and regulatory priorities. Deep expertise in distributed systems, event-driven architecture, and AI-enabled platforms, combined with hands-on leadership of Agile SDLC workflows that accelerate delivery velocity and elevate engineering quality. Adept at partnering with senior stakeholders across technology and business to translate strategic objectives into scalable, high-availability solutions in regulated environments.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Cloud-Native Application Development (AWS, Kubernetes) | Full-Lifecycle SDLC Leadership | Agile Delivery & Program Management | Event-Driven Architecture (Kafka) | Distributed Systems & High-Availability Platforms | AI & GenAI Platforms (RAG, Agentic AI) | Data Engineering (Spark, Databricks, ETL/ELT) | Trading, Risk & Capital Markets Technology | Global Engineering Team Leadership | Regulatory & Compliance Systems (FRB, FINRA, SEC, SOX) | Executive Stakeholder Engagement | Java, Python, REST/SOA Engineering

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Led full-lifecycle application development and delivery across trading and data platforms supporting **\$1T+ daily processing**, owning architecture, engineering execution, and production stability end-to-end
- Directed global engineering teams of **30+ engineers across US, UK, and India**, driving Agile SDLC practices that improved delivery velocity by **15%** and elevated software quality across release cycles
- Modernized legacy applications into cloud-native, event-driven architecture leveraging AWS, Kafka, and Kubernetes, improving system throughput by **40%** and reducing infrastructure costs by **30%**
- Delivered real-time trading, pricing, and risk platforms with **99.97% uptime**, ensuring continuous availability for mission-critical capital markets operations
- Implemented AI-assisted development workflows and ML-based anomaly detection, accelerating engineering delivery by **35%** and improving operational intelligence

- Ensured full regulatory compliance (FRB, FINRA, SEC, SOX) across all application development programs, partnering with risk, compliance, and audit stakeholders throughout the SDLC
- Partnered with senior business and technology executives to define platform roadmaps, manage program budgets, and translate strategic priorities into scalable engineering solutions

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led application development and delivery for real-time pricing and analytics platforms supporting structured products and mortgage trading desks
- Consolidated and re-architected risk systems, contributing to **~\$2B capital efficiency** through improved data accuracy and platform performance
- Managed cross-functional engineering teams through full SDLC, from requirements through production deployment, in a regulated financial services environment

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications, improving operational efficiency for the whole loan trading desk
- Introduced CI/CD practices that reduced release cycles from monthly to weekly, establishing a foundation for modern Agile delivery

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms including RAG pipelines and agentic AI systems for real-world enterprise applications
- Applied ML for anomaly detection and operational intelligence across capital markets platforms
- Driving AI-assisted SDLC workflows that measurably improve delivery speed, code quality, and engineering productivity

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, global engineering team leadership (30+ engineers), P&L ownership, strategic planning, program management, Agile SDLC, ITIL, SOX, FRB/FINRA/SEC compliance

Application Development & Architecture: Full-lifecycle software development, cloud-native architecture (AWS, Kubernetes), enterprise and distributed systems architecture, event-driven systems (Kafka), high-availability platforms (99.97% uptime), REST/SOA, WebLogic, CI/CD

AI & Data: GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB

Engineering: Java, Python, Node.js, SQL, Oracle, Sybase, Kafka, Kubernetes, AWS

Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
