Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

Technology risk and controls executive with 17+ years of experience in financial services, combining deep expertise in control design, operating effectiveness, and regulatory compliance across mission-critical capital markets and enterprise data platforms. Proven ability to assess remediation completeness and sustainability across complex technology environments, evaluate evidence of risk reduction, and deliver clear, well-supported conclusions to senior stakeholders and regulators. Experienced leading risk-based reviews that function as end-to-end assessments of technology issues — including planning, testing, evidence evaluation, and reporting — across trading, risk, and data systems subject to FRB, FINRA, and SEC oversight. Adept at translating technical findings into actionable insights for executive and audit audiences while driving sustainable control improvements at scale.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Regulatory & Compliance Oversight (FRB, FINRA, SEC, SOX) | Technology Risk Assessment & Issue Validation | Control Design & Operating Effectiveness Evaluation | Evidence Evaluation & Risk-Based Testing | Audit Reporting & Executive Communication | Trading & Risk Platform Governance | Cloud-Native Architecture (AWS, Kubernetes) | AI & GenAI Platforms (RAG, Agentic AI) | Event-Driven Systems (Kafka) | Data Engineering (Spark, Databricks, ETL/ELT) | Global Team Leadership | Platform Modernization

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Ensured regulatory compliance (FRB, FINRA, SEC) across mission-critical trading, risk, and data systems, engaging directly with regulators and internal audit functions on control design and operating effectiveness
- Led enterprise-scale platform transformation across trading and data systems supporting **\$1T+ daily processing**, assessing residual risk and validating sustainability of remediation across the technology estate
- Implemented ML-based anomaly detection and AI-assisted development workflows, establishing measurable controls and evidence-based reporting on operational risk reduction
- Delivered real-time trading, pricing, and risk platforms improving throughput by **40%**, with governance frameworks ensuring control effectiveness across the full SDLC
- Modernized legacy systems into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), validating that architectural changes materially reduced technology and operational risk

- Built and led global engineering teams (**30+ across US/UK/India**), driving **15% velocity improvement** while maintaining compliance with regulatory and audit requirements
- Produced clear, evidence-backed reporting of technology risk conclusions for senior leadership and regulatory stakeholders

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation of risk systems contributing to **~\$2B capital efficiency**, including assessment of control gaps and validation that remediated systems met risk reduction objectives
- Built real-time pricing and analytics platforms for structured products and mortgage trading, with oversight of control design and operating effectiveness across the risk technology stack
- Engaged with internal audit and compliance teams to validate that technology changes sustainably addressed identified issues and residual risks

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications with embedded controls aligned to regulatory and audit requirements
- Introduced CI/CD practices reducing release cycle from monthly to weekly, improving control consistency and auditability across the SDLC

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world applications, including operational intelligence and evidence synthesis use cases relevant to audit and risk workflows
- Applied ML for anomaly detection and operational intelligence, enabling proactive identification of control failures and residual risk indicators
- Driving AI-assisted SDLC workflows improving delivery speed, quality, and auditability

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, audit and regulatory engagement, global team leadership (30+ engineers), P&L ownership, strategic planning, program management, SDLC, Agile, ITIL **Risk & Compliance:** SOX, FRB/FINRA/SEC compliance, technology risk assessment, issue validation, control design evaluation, operating effectiveness testing, evidence evaluation, residual risk analysis, regulatory reporting **Architecture:** Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime) **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python, Node.js, SQL, Oracle,

Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
