PROFESSIONAL SUMMARY

Technology Risk and Compliance executive with 17+ years of experience anticipating emerging operational risks and driving responsible technology governance across mission-critical capital markets platforms at Bank of America. Proven track record ensuring regulatory compliance with FRB, FINRA, and SEC mandates while leading enterprise-scale platform transformation supporting \$1T+ daily processing. Combines deep expertise in technology operational risk management, distributed systems, and AI-enabled platforms with the executive judgment to solve real-world challenges that protect firm resilience and enable responsible business growth. Adept at partnering with senior stakeholders across Risk Management, Compliance, and Engineering to challenge the status quo and embed risk-aware culture across global teams.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Regulatory & Compliance Systems (FRB, FINRA, SEC, SOX) | Technology Operational Risk Management | Executive Stakeholder Leadership | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | Trading & Risk Platforms | AI & GenAI Platforms (RAG, Agentic AI) | Platform Modernization | Data Engineering (Spark, Databricks, ETL/ELT) | Global Team Leadership | High-Availability & Resilience Engineering | SDLC Governance & Agile Delivery

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Ensured regulatory compliance with FRB, FINRA, and SEC mandates across mission-critical trading, risk, and capital markets systems processing **\$1T+ daily**
- Anticipated and mitigated emerging technology operational risks across cloud-native, event-driven platforms (AWS, Kafka, Kubernetes), maintaining **99.97% uptime**
- Led enterprise-scale platform transformation across trading and data systems, embedding risk controls and compliance governance throughout the SDLC
- Modernized legacy systems into cloud-native, event-driven architecture, reducing operational risk exposure while improving throughput by **40%**
- Implemented AI-assisted development workflows and ML-based anomaly detection to proactively identify and address operational risk signals
- Built and led global engineering teams (**30+ across US/UK/India**), instilling risk-aware engineering culture and driving **15% velocity improvement**

- Delivered real-time trading, pricing, and risk platforms with high-availability design and resilience controls aligned to regulatory expectations

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation of risk systems with embedded compliance controls, contributing to ~\$2B capital efficiency
- Built real-time pricing and analytics platforms for structured products and mortgage trading, ensuring operational risk standards were met across all environments
- Partnered with Risk Management and Compliance stakeholders to align technology delivery with regulatory and audit requirements

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications with compliance and audit traceability built into core design
- Introduced CI/CD practices reducing release cycle from monthly to weekly, improving change management controls and reducing operational risk

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) to enhance operational intelligence and risk identification in real-world applications
- Applied ML for anomaly detection, enabling proactive operational risk monitoring across large-scale distributed systems
- Driving AI-assisted SDLC workflows that improve delivery speed, quality, and risk governance

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, global team leadership (30+ engineers), P&L ownership, strategic planning, program management, SDLC governance, Agile, ITIL, SOX, FRB/FINRA/SEC compliance, technology operational risk management

Architecture: Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime), resilience engineering

AI & Data: GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB

Engineering: Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS

Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
