Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

Technology risk and controls executive with 17+ years of experience in financial services, combining deep expertise in control design, operating effectiveness, and regulatory compliance across mission-critical capital markets and enterprise data platforms. Proven ability to assess technology risk, evaluate remediation sustainability, and deliver clear, evidence-based conclusions on control gaps across trading, risk, and data systems supporting \$1T+ daily processing. Experienced in executing risk-based assessments that function as end-to-end reviews — encompassing planning, testing, evidence evaluation, and reporting — aligned to FRB, FINRA, and SEC regulatory standards. Adept at engaging executive stakeholders and global teams to drive accountability, validate issue closure, and ensure residual risk is materially reduced.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Regulatory & Compliance Systems (FRB, FINRA, SEC) | Technology Risk Assessment & Control Validation | Control Design & Operating Effectiveness Evaluation | Issue Remediation & Residual Risk Analysis | Evidence Evaluation & Audit Reporting | Executive Stakeholder Leadership | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | AI & GenAI Platforms (RAG, Agentic AI) | Trading & Risk Platforms | Data Engineering (Spark, Databricks, ETL/ELT) | Global Team Leadership

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Ensured regulatory compliance (FRB, FINRA, SEC) across mission-critical trading, risk, and data systems, evaluating control design and operating effectiveness against regulatory expectations
- Led enterprise-scale platform transformation across trading and data systems supporting **\$1T+ daily processing**, assessing remediation completeness and sustainability at each milestone
- Delivered real-time trading, pricing, and risk platforms improving throughput by **40%**, with rigorous validation that performance and control objectives were durably met
- Modernized legacy systems into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), validating that architectural changes materially reduced residual technology risk
- Implemented AI-assisted development workflows and ML-based anomaly detection, evaluating control effectiveness of new tooling prior to production deployment

- Built and led global engineering teams (**30+ across US/UK/India**), driving accountability for issue closure and **15% velocity improvement** through structured program governance
- Produced clear, evidence-based reporting of control conclusions for executive stakeholders and regulatory audiences

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation of risk systems contributing to **~\$2B capital efficiency**, validating that remediated controls sustainably reduced exposure across structured products and mortgage trading
- Built real-time pricing and analytics platforms for structured products and mortgage trading, ensuring control design met regulatory and audit standards throughout delivery
- Assessed technology risk and control gaps across legacy and modernized environments, providing evidence-based conclusions to senior leadership on remediation effectiveness

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications with embedded controls aligned to compliance and audit requirements
- Introduced CI/CD practices reducing release cycle from monthly to weekly, validating that accelerated delivery did not compromise control integrity or operating effectiveness

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world applications, including control monitoring and operational intelligence use cases
- Applied ML for anomaly detection, enabling proactive identification of control failures and technology risk signals
- Driving AI-assisted SDLC workflows with embedded quality and control validation gates, improving delivery speed and audit readiness

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, global team leadership (30+ engineers), P&L ownership, strategic planning, program management, SDLC, Agile, ITIL, SOX, FRB/ FINRA/SEC compliance **Risk & Controls:** Technology risk assessment, control design evaluation, operating effectiveness testing, issue remediation validation, residual risk analysis, evidence evaluation, audit reporting, regulatory compliance (FRB, FINRA, SEC, SOX) **Architecture:** Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime) **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python,

Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Tools:**
ServiceNow, JIRA, Git, Visio, Microsoft Project
