PROFESSIONAL SUMMARY

Senior Technology Executive with 17+ years leading complex, multi-functional technology programs across global financial services operations at Bank of America, with deep expertise in enterprise platform engineering, client-facing systems, and document-intensive workflows. Proven ability to steer large-scale software engineering initiatives that elevate client and employee experiences, integrating cloud-native, AI-enabled, and event-driven solutions to deliver measurable business outcomes across global operations. Combines executive stakeholder leadership and advanced analytical reasoning with hands-on experience in GenAI, data engineering, and distributed systems to drive dynamic impact at enterprise scale. Adaptable leader with a track record of building and scaling high-performing global engineering teams aligned to regulatory, compliance, and strategic business objectives.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Global Engineering Program Leadership | Client & Employee Experience Platforms | Enterprise Platform Modernization | Document & Data Engineering (Spark, Databricks, ETL/ELT) | AI & GenAI Platforms (RAG, Agentic AI) | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | Executive Stakeholder Management | Regulatory & Compliance Systems (FRB, FINRA, SEC, SOX) | Trading & Risk Platforms | Distributed Systems & High-Availability Architecture | Agile SDLC & Program Management

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Steered enterprise-scale, multi-functional technology programs across trading and data systems supporting **\$1T+ daily processing**, coordinating impact across clients, employees, and global stakeholders
- Led platform modernization initiatives transforming legacy infrastructure into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), improving throughput by **40%** and enabling scalable onboarding of new business lines
- Built and led global engineering teams (**30+ engineers across US/UK/India**), driving **15% velocity improvement** through Agile delivery practices and AI-assisted SDLC workflows
- Delivered real-time trading, pricing, and risk platforms with **99.97% uptime**, ensuring reliability for mission-critical client and operational workflows
- Implemented ML-based anomaly detection and AI-assisted development workflows, accelerating delivery speed and elevating engineering quality across multi-functional programs

- Ensured regulatory compliance (FRB, FINRA, SEC, SOX) across all mission-critical systems, partnering with legal, risk, and compliance stakeholders at the executive level
- Applied advanced analytical reasoning to architect scalable, high-availability distributed systems supporting complex, document-intensive data flows across global operations

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation of risk and data systems across structured products and mortgage trading, contributing to ~\$2B capital efficiency and streamlining multi-stakeholder workflows
- Built real-time pricing and analytics platforms for structured products and mortgage trading, improving client-facing data delivery and operational transparency
- Partnered with business, compliance, and technology stakeholders to align platform capabilities with evolving regulatory and client onboarding requirements

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications, enabling streamlined document and data workflows for trading desk operations
- Introduced CI/CD practices reducing release cycle from monthly to weekly, accelerating delivery of client-impacting features and operational improvements

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) applicable to document engineering, intelligent onboarding workflows, and real-world enterprise automation
- Applied ML for anomaly detection and operational intelligence across large-scale data and document processing pipelines
- Driving AI-assisted SDLC workflows improving delivery speed, engineering quality, and team productivity

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, global engineering program leadership (30+ engineers), P&L ownership, strategic planning, Agile SDLC, program management, ITIL, SOX, FRB/FINRA/SEC compliance, multi-functional team coordination

Architecture: Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime), document and data engineering pipelines

AI & Data: GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB

Engineering: Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS

Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
