PROFESSIONAL SUMMARY

Seasoned Technology Executive with 17+ years architecting and evolving high-throughput backend services, APIs, and data platforms across capital markets and investment management at Bank of America. Proven track record owning technical architecture for trading, portfolio, and risk systems — designing reliable, well-documented APIs and data contracts built for scale across internal portals and external integrations. Combines deep expertise in event-driven systems, distributed architecture, and cloud-native infrastructure with hands-on GenAI and ML capabilities to drive long-term maintainability and accelerate delivery across advisor workflow, trade management, and rebalancing platforms.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Backend Services Architecture (FastAPI, REST/SOA, Event-Driven) | API Design & Data Contracts | Event-Driven Systems (Kafka, RabbitMQ) | Cloud-Native Architecture (AWS, Kubernetes) | Trade Management & Portfolio Platforms | Advisor Workflow Systems | AI & GenAI Platforms (RAG, Agentic AI) | Data Engineering (Spark, Databricks, ETL/ELT) | Global Team Leadership | Regulatory & Compliance Systems

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Owned technical architecture and evolution of backend services supporting **\$1T+ daily processing** across trading, pricing, and risk platforms — balancing speed of delivery with long-term maintainability
- Designed and governed APIs and data contracts consumed by internal portals and external integrations, ensuring reliability, documentation standards, and scalability across mission-critical systems
- Modernized legacy systems into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), improving throughput by **40%** across trade management and risk workflows
- Delivered real-time trading, pricing, and portfolio risk platforms with **99.97% uptime** across global operations
- Implemented AI-assisted development workflows and ML-based anomaly detection to improve operational intelligence and delivery quality
- Built and led global engineering teams (**30+ across US/UK/India**), driving **15% velocity improvement** and instilling engineering best practices across the SDLC
- Ensured regulatory compliance (FRB, FINRA, SEC) across all mission-critical trading and advisor-facing systems

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation and re-architecture of risk and pricing systems across structured products and mortgage trading, contributing to **~\$2B capital efficiency**
- Built real-time pricing and analytics platforms supporting portfolio rebalancing and structured product trade management
- Designed backend services and data pipelines enabling advisor and trading desk workflows at scale

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications underpinning whole loan trade management workflows
- Introduced CI/CD practices reducing release cycle from monthly to weekly, improving maintainability and delivery cadence

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world investment and operational applications
- Applied ML for anomaly detection and operational intelligence across trading and risk platforms
- Driving AI-assisted SDLC workflows improving delivery speed, code quality, and long-term maintainability

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, global team leadership (30+ engineers), P&L ownership, strategic planning, program management, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance

Architecture: Backend services architecture, API design & data contracts, event-driven systems (Kafka, RabbitMQ), cloud-native architecture (AWS, Kubernetes), distributed systems, high-availability platforms (99.97% uptime), enterprise architecture

AI & Data: GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB

Engineering: Java, Python, Node.js, SQL, REST/SOA, FastAPI, Oracle, Sybase, WebLogic, Kafka, Kubernetes, AWS

Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
