

ARUN ARUNACHALAM

Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

Technology executive with 17+ years translating AI strategy into production-grade platforms, solutions, and products across complex enterprise environments. Operates at the intersection of architecture, engineering, and product thinking — building and deploying robust, scalable GenAI systems (RAG pipelines, agentic AI) and ML-enabled platforms that deliver measurable business outcomes. Proven track record owning end-to-end technical integrity of enterprise solutions from concept through implementation, leading global engineering teams, and driving AI-assisted delivery workflows that accelerate velocity and quality at scale.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

AI & GenAI Platforms (RAG Pipelines, Agentic AI) | Applied AI Strategy to Production Deployment | Cloud-Native Architecture (AWS, Kubernetes) | Enterprise Architecture & Platform Engineering | Event-Driven Systems (Kafka) | Data Engineering (Spark, Databricks, ETL/ELT) | ML Anomaly Detection & Operational Intelligence | AI-Assisted SDLC | Global Engineering Team Leadership | Executive Stakeholder Engagement | Platform Modernization & Scalability | Regulatory & Compliance Systems

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Built and deployed production-grade GenAI and ML platforms supporting enterprise-scale operations, including AI-assisted development workflows and ML-based anomaly detection across mission-critical systems
- Owned end-to-end technical integrity of solutions — from concept through implementation — modernizing legacy infrastructure into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes) supporting **\$1T+ daily processing**
- Translated architectural patterns and engineering standards into working, deployed systems — delivering real-time trading, pricing, and risk platforms improving throughput by **40%**
- Led global engineering teams (**30+ across US/UK/India**), driving **15% velocity improvement** through AI-assisted SDLC practices and Agile delivery frameworks
- Ensured solutions were robust, scalable, and compliant with enterprise regulatory standards (FRB, FINRA, SEC) across all production deployments

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Architected and deployed real-time pricing and analytics platforms for structured products and mortgage trading, owning full solution lifecycle from design through production

- Led consolidation of risk systems contributing to ~\$2B capital efficiency, aligning platform engineering with enterprise strategy

Bank of America — AVP, Whole Loan Trading Desk Support (*prior to 2011*)

- Architected and delivered end-to-end Java EE trading support applications, establishing engineering standards adopted across the platform
- Introduced CI/CD practices reducing release cycle from monthly to weekly, accelerating production deployment cadence

Senior Programmer Analyst — Knight Trading (*2004*)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (*2003*)

Sr. Java Web Developer — Mellon Investor Services (*2001*)

Sr. Java GUI Developer — Thomson Financials (*2001*)

Sr. Java GUI Developer — Icor Brokerage (*2000*)

AI & INNOVATION

- Building production-grade GenAI platforms including RAG pipelines and agentic AI systems deployed in real enterprise environments
- Applied ML for anomaly detection and operational intelligence across large-scale distributed platforms
- Driving AI-assisted SDLC workflows that improve delivery speed, engineering quality, and team productivity at scale

EDUCATION

Bachelor of Technology — Anna University

SKILLS

AI & Data: GenAI (RAG pipelines, agentic AI), applied AI strategy to production deployment, ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB

Architecture: Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime)

Engineering: Python, Java, Node.js, SQL, REST/SOA, Kafka, Kubernetes, AWS, Oracle, Sybase, WebLogic

Leadership: Executive stakeholder management, global team leadership (30+ engineers), P&L ownership, strategic planning, program management, Agile, SDLC, ITIL, SOX, FRB/FINRA/SEC compliance

Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
