Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

Technology executive with 17+ years of experience securing and managing enterprise infrastructure across mission-critical financial systems, including privileged access controls, credential management, and regulatory compliance at Bank of America. Proven track record integrating complex IT systems—databases, ServiceNow, and distributed platforms—with secure access and identity frameworks supporting \$1T+ daily processing environments. Deep expertise in cloud-native architecture, platform modernization, and compliance with FRB, FINRA, and SEC mandates ensures privileged access management infrastructure meets the highest standards of security and operational integrity. Combines executive stakeholder leadership with hands-on engineering depth to install, configure, and maintain secure platforms at enterprise scale.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Privileged Access Management & Secure Credential Management | Regulatory & Compliance Systems (FRB, FINRA, SEC, SOX) | ServiceNow Integration & ITSM Workflows | Cloud-Native Architecture (AWS, Kubernetes) | Identity & Access Controls | Database & Systems Integration (Oracle, Sybase, SQL) | Platform Modernization & Configuration Management | Event-Driven Systems (Kafka) | AI & GenAI Platforms (RAG, Agentic AI) | Global Team Leadership | Executive Stakeholder Management | High-Availability Platform Engineering (99.97% Uptime)

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Ensured regulatory compliance (FRB, FINRA, SEC) across mission-critical systems, enforcing secure access controls and credential governance for platforms supporting **\$1T+ daily processing**
- Managed ServiceNow-integrated workflows across enterprise platform operations, supporting incident management, change control, and secure access provisioning processes
- Modernized legacy systems into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), including configuration, installation, and ongoing maintenance of enterprise platforms
- Delivered real-time trading, pricing, and risk platforms with **99.97% uptime**, ensuring high-availability and operational integrity of privileged infrastructure
- Implemented ML-based anomaly detection and AI-assisted development workflows to enhance operational intelligence and security monitoring across distributed systems

- Built and led global engineering teams (**30+ across US/UK/India**), coordinating cross-functional delivery across database, network, and application system integrations
- Led enterprise-scale platform transformation across trading and data systems, driving **40% throughput improvement** and **30% cost reduction**

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation of risk systems with strict access governance and compliance controls, contributing to **~\$2B capital efficiency**
- Built and maintained real-time pricing and analytics platforms for structured products and mortgage trading, integrating databases and application systems with secure operational frameworks
- Managed secure credential and access processes across multi-system environments supporting regulated trading operations

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications with integrated security and access control frameworks
- Introduced CI/CD practices reducing release cycle from monthly to weekly, improving configuration management and deployment integrity

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world enterprise applications
- Applied ML for anomaly detection and operational intelligence across distributed financial systems
- Driving AI-assisted SDLC workflows improving delivery speed, security posture, and quality

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, global team leadership (30+ engineers), P&L ownership, strategic planning, program management, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance

Security & Access Management: Privileged access controls, secure credential management, identity and access governance, regulatory compliance (SOX, FRB, FINRA, SEC), audit and control frameworks

Systems Integration: ServiceNow, database integration (Oracle, Sybase, SQL), REST/SOA, network and application system integration, configuration and change management

Architecture: Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime)

AI & Data: GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB

Engineering: Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS

Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
