

ARUN ARUNACHALAM

Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

AI-first Technology Executive with 17+ years leading large-scale platform transformation and NextGen technology strategy across complex, mission-critical enterprise environments. Proven track record shaping technology as a strategic growth engine — delivering agentic AI workflows, cloud-native platforms, and experience-led architectures that drive measurable clinical and operational outcomes. Deep expertise building and leading global engineering organizations, modernizing legacy systems into scalable event-driven platforms, and partnering with senior executives to align technology investment with competitive business strategy. Brings a hands-on command of GenAI, agentic AI systems, and AI-assisted delivery to accelerate transformation at enterprise scale.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

AI-First & Agentic AI Platforms (RAG, Agentic Workflows) | Platform Transformation & NextGen Strategy | Experience-Led Platform Design | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | Data Engineering (Spark, Databricks, ETL/ELT) | Executive Stakeholder Leadership | Global Team Leadership (30+ Engineers) | Regulatory & Compliance Systems | Operational Intelligence & ML | Program Management & Strategic Planning | High-Availability, Mission-Critical Platforms

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Shaped technology as a strategic growth engine, leading enterprise-scale platform transformation across trading and data systems supporting **\$1T+ daily processing**
- Drove NextGen platform strategy, modernizing legacy systems into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes) to enable scalable, future-ready capabilities
- Designed and delivered experience-led, real-time platforms improving throughput by **40%**, directly enabling business competitiveness at scale
- Implemented AI-first development workflows and agentic AI capabilities, including ML-based anomaly detection and AI-assisted SDLC, achieving **35% faster delivery** and **45% productivity gain**
- Built and led global engineering organizations (**30+ engineers across US/UK/India**), driving **15% velocity improvement** through structured team leadership and strategic talent development
- Partnered with senior executive stakeholders to align technology investment with enterprise strategy and regulatory requirements (FRB, FINRA, SEC)

- Ensured **99.97% uptime** across mission-critical, high-availability platforms serving enterprise-wide operations

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation and transformation of risk and analytics platforms contributing to ~\$2B **capital efficiency**, demonstrating technology's direct impact as a strategic business enabler
- Built real-time pricing and analytics platforms for structured products and mortgage trading, delivering scalable, experience-led capabilities for complex operational workflows
- Drove platform modernization initiatives that improved delivery speed, operational resilience, and cross-functional alignment

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end enterprise applications supporting complex trading operations, establishing foundational platform capabilities
- Introduced CI/CD practices that transformed release cycles from monthly to weekly, accelerating delivery velocity and improving platform agility

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms leveraging RAG pipelines and agentic AI systems to power intelligent, autonomous workflows in real-world enterprise environments
- Applied ML for anomaly detection and operational intelligence, enabling proactive platform management and data-driven decision-making
- Driving AI-first SDLC transformation — embedding agentic workflows across the software delivery lifecycle to improve speed, quality, and engineering productivity at scale

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, global team leadership (30+ engineers), P&L ownership, strategic planning, NextGen technology strategy, program management, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance

Architecture: Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, experience-led platform design, high-availability platforms (99.97% uptime)

AI & Data: GenAI (RAG pipelines, agentic AI), agentic workflows, ML anomaly detection, AI-assisted SDLC, operational intelligence, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB

Engineering: Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS

Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
