PROFESSIONAL SUMMARY

Engineering leader with 17+ years scaling high-performing teams and mission-critical platforms in financial services, with a proven track record of evolving engineering organizations from early-stage execution to structured, scalable systems without sacrificing speed. Deep expertise in cloud-native architecture, event-driven systems, and AI-enabled platforms — built and sustained at enterprise scale across capital markets and data engineering at Bank of America. Combines hands-on technical depth in distributed systems, GenAI, and platform modernization with the executive stakeholder leadership required to drive predictable, high-quality delivery as organizations scale. Adept at instilling engineering rigor, Agile practices, and SDLC discipline while preserving the velocity that defines high-growth environments.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Engineering Organization Scaling & Structuring | Platform Modernization & Cloud-Native Architecture (AWS, Kubernetes) | High-Performing Team Leadership | Predictable, High-Quality Delivery | Event-Driven Systems (Kafka) | AI & GenAI Platforms (RAG, Agentic AI) | Agile & SDLC Discipline | Data Engineering (Spark, Databricks, ETL/ELT) | Trading & Risk Platforms | Executive Stakeholder Leadership | Regulatory & Compliance Systems (FRB, FINRA, SEC)

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Evolved global engineering organization from reactive execution to a structured, scalable delivery model — improving team velocity by **15%** while sustaining **99.97% uptime** across **50+ systems**
- Built and led high-performing global engineering teams (**30+ engineers across US/UK/India**), establishing Agile practices, SDLC discipline, and engineering rigor without sacrificing delivery speed
- Led enterprise-scale platform transformation across trading and data systems supporting **\$1T+ daily processing**, modernizing legacy infrastructure into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes)
- Drove predictable, high-quality delivery of real-time trading, pricing, and risk platforms — improving throughput by **40%** and reducing costs by **30%** on an **\$8M** transformation program

- Implemented AI-assisted development workflows and ML-based anomaly detection, accelerating delivery speed by **35%** and productivity by **45%**
- Ensured regulatory compliance (FRB, FINRA, SEC) across mission-critical systems at enterprise scale

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Scaled and structured engineering delivery for structured products and mortgage trading platforms, contributing to **~\$2B capital efficiency** through risk system consolidation
- Built real-time pricing and analytics platforms, establishing repeatable delivery patterns that supported organizational growth
- Led cross-functional engineering teams through complex, multi-system integration programs with high regulatory and business-impact stakes

Bank of America — AVP, Whole Loan Trading Desk Support (*prior to 2011*)

- Architected and delivered end-to-end Java EE trading support applications, establishing foundational platform patterns still in use at scale
- Introduced CI/CD practices that compressed release cycles from monthly to weekly — an early example of instilling engineering discipline to accelerate delivery without sacrificing quality

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world financial services applications
- Applied ML for anomaly detection and operational intelligence across mission-critical trading and risk systems
- Driving AI-assisted SDLC workflows that improve delivery speed, engineering quality, and team productivity at scale

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Engineering organization scaling, high-performing team leadership (30+ engineers), executive stakeholder management, P&L ownership, strategic planning, program management, Agile, SDLC, ITIL, SOX, FRB/FINRA/SEC compliance

Architecture: Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime), platform modernization

AI & Data: GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB

Engineering: Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS

Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
