## PROFESSIONAL SUMMARY

---

Strategic Data Architecture Governance leader with 17+ years driving enterprise data platform architecture, risk and controls oversight, and architecture decision leadership across capital markets and enterprise data systems at Bank of America. Deep expertise establishing data architecture standards, reference patterns, and governance frameworks across large-scale, cloud-native and event-driven data landscapes supporting \$1T+ daily processing. Combines hands-on command of distributed data engineering (Spark, Databricks, Kafka, Snowflake) with executive stakeholder alignment and regulatory compliance (FRB, FINRA, SEC) to ensure enterprise-wide architectural coherence and long-term data strategy execution. Proven record modernizing legacy data infrastructure into governed, cloud-native platforms delivering measurable business outcomes at scale.

## SIGNATURE IMPACT

---

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

## CORE CAPABILITIES

---

Enterprise Data Architecture Governance | Data Architecture Standards & Reference Patterns | Risk & Controls Oversight | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | Data Engineering (Spark, Databricks, ETL/ELT, Snowflake) | AI & GenAI Platforms (RAG, Agentic AI) | Regulatory & Compliance Systems (FRB, FINRA, SEC) | Executive Stakeholder Leadership | Platform Modernization | Distributed Systems | Trading & Risk Platforms

## PROFESSIONAL EXPERIENCE

---

### **Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)**

- Established and enforced enterprise data architecture standards and governance frameworks across trading and data platforms supporting **\$1T+ daily processing**
- Led architecture decision leadership for cloud-native, event-driven platform modernization (AWS, Kafka, Kubernetes), ensuring alignment of reference patterns across 50+ systems
- Drove risk and controls oversight across mission-critical data systems, ensuring regulatory compliance with FRB, FINRA, and SEC requirements
- Architected and governed enterprise-scale data engineering pipelines (Spark, Databricks, ETL/ELT, Snowflake) underpinning real-time trading, pricing, and risk platforms
- Delivered real-time trading, pricing, and risk platforms improving throughput by **40%** through governed architectural standards and platform consistency
- Implemented AI-assisted development workflows and ML-based anomaly detection to advance operational intelligence across the data landscape

- Ensured enterprise-wide alignment of data platform architecture to long-term business objectives across global engineering teams spanning US, UK, and India

#### **Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)**

- Governed consolidation of risk and data systems across structured products and mortgage trading, contributing to ~\$2B capital efficiency
- Established data architecture standards for real-time pricing and analytics platforms, ensuring consistency and control across structured products and mortgage trading systems
- Built real-time pricing and analytics platforms with governed data architecture patterns supporting high-volume, low-latency trading operations

#### **Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)**

- Architected and delivered end-to-end Java EE trading support applications with disciplined engineering standards and controls
- Introduced CI/CD practices reducing release cycle from monthly to weekly, establishing repeatable delivery governance

#### **Senior Programmer Analyst — Knight Trading (2004)**

#### **DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)**

#### **Sr. Java Web Developer — Mellon Investor Services (2001)**

#### **Sr. Java GUI Developer — Thomson Financials (2001)**

#### **Sr. Java GUI Developer — Icor Brokerage (2000)**

### **AI & INNOVATION**

---

- Building GenAI platforms (RAG pipelines, agentic AI systems) to enable intelligent, governed data decision systems for real-world enterprise applications
- Applied ML for anomaly detection and operational intelligence across enterprise data platforms
- Driving AI-assisted SDLC workflows improving delivery speed, quality, and architectural governance

### **EDUCATION**

---

**Bachelor of Technology** — Anna University

### **SKILLS**

---

**Architecture & Governance:** Enterprise data architecture governance, data architecture standards & reference patterns, risk & controls oversight, cloud-native architecture (AWS, Kubernetes), event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime), enterprise architecture

**Data Engineering:** Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB, Oracle, Sybase, SQL

**AI & Data Intelligence:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC

**Engineering:** Java, Python, Node.js, REST/SOA, WebLogic, Kafka, Kubernetes, AWS

**Leadership & Compliance:** Executive stakeholder management, global team leadership, P&L ownership, strategic planning, program management, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance

**Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
