PROFESSIONAL SUMMARY

Senior technology executive with 17+ years delivering AI-powered, cloud-native engineering solutions across capital markets and payments-adjacent financial platforms at Bank of America. Deep expertise embedding AI and GenAI (RAG pipelines, agentic AI) into production SDLC and PDLC workflows, driving measurable gains in delivery velocity, platform scalability, and operational intelligence. Proven track record operationalizing robust, secure, and high-availability distributed systems — including event-driven architectures on Kafka and Kubernetes — supporting \$1T+ daily processing across mission-critical financial infrastructure. Combines executive stakeholder leadership with hands-on architectural depth to translate AI innovation into scalable, compliant engineering outcomes within highly regulated environments.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

AI & GenAI Platforms (RAG Pipelines, Agentic AI) | AI-Embedded SDLC & PDLC | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | Distributed Systems & High-Availability Platforms | Data Engineering (Spark, Databricks, ETL/ELT) | Trading, Risk & Payments Technology | Platform Modernization & Scalability | Regulatory & Compliance Systems (FRB, FINRA, SEC) | Executive Stakeholder Leadership

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Implemented AI-assisted development workflows across the SDLC, achieving **35% faster delivery** and **45% productivity gain** — directly embedding AI into engineering execution and operationalization
- Led enterprise-scale platform transformation across trading and data systems supporting **\$1T+ daily processing**, delivering robust, secure, and scalable engineering outcomes
- Modernized legacy systems into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), enabling high-availability platforms at **99.97% uptime**
- Applied ML-based anomaly detection to production systems, operationalizing intelligent monitoring and operational intelligence at scale
- Delivered real-time trading, pricing, and risk platforms improving throughput by **40%** across mission-critical financial infrastructure
- Ensured regulatory compliance (FRB, FINRA, SEC) across all production platforms, maintaining security and governance standards throughout the SDLC

- Built and led global engineering teams (**30+ across US/UK/India**) driving **15% velocity improvement** across distributed delivery programs

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation of risk systems contributing to **~\$2B capital efficiency**, delivering scalable analytics platforms aligned to regulatory and business requirements
- Built real-time pricing and analytics platforms for structured products and mortgage trading, establishing foundational event-driven and distributed system patterns

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications, establishing core platform engineering practices
- Introduced CI/CD practices reducing release cycle from monthly to weekly, accelerating SDLC operationalization

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world production applications, focused on operationalizing AI at scale within financial services contexts
- Applied ML for anomaly detection and operational intelligence across mission-critical distributed systems
- Driving AI-assisted SDLC and PDLC workflows that measurably improve delivery speed, engineering quality, and platform reliability

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, global team leadership, P&L ownership, strategic planning, program management, SDLC, PDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance

Architecture: Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime)

AI & Data: GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC/PDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB

Engineering: Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS

Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
