

ARUN ARUNACHALAM

Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

Enterprise Architecture executive with 17+ years stewarding large-scale platform transformation across capital markets and enterprise data systems at Bank of America, with a consistent record of translating architectural vision into measurable business outcomes. Deep expertise defining standards, patterns, and reference architectures for cloud-native, event-driven, and AI-enabled platforms spanning multiple lines of business. Proven ability to balance strategic and tactical initiatives — modernizing legacy infrastructure while driving efficiency, cost reduction, and innovation at enterprise scale. Brings hands-on depth in distributed systems, GenAI platforms, and regulatory-grade technology design to accelerate delivery and enable intelligent, future-ready systems.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Enterprise Architecture & Reference Architecture Design | Technology Standards & Design Principles | Cloud-Native Architecture (AWS, Kubernetes) | AI & GenAI Platforms (RAG, Agentic AI) | Event-Driven Systems (Kafka) | Platform Modernization & Legacy Transformation | Data Engineering (Spark, Databricks, ETL/ELT) | Trading & Risk Platforms | Executive Stakeholder Leadership | Regulatory & Compliance Systems | Global Team Leadership

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Defined and stewarded enterprise architecture vision across trading and data platforms supporting **\$1T+ daily processing**, establishing standards and patterns adopted across global engineering teams
- Modernized legacy systems into cloud-native, event-driven reference architectures (AWS, Kafka, Kubernetes), serving as the authoritative architectural voice across multiple lines of business
- Delivered real-time trading, pricing, and risk platforms improving throughput by **40%**, grounded in modern technology design principles and high-availability architecture (**99.97% uptime**)
- Drove enterprise-wide efficiency and cost savings through architectural governance, contributing to **30% cost reduction** across a **\$8M** transformation program
- Implemented AI-assisted development workflows and ML-based anomaly detection, fostering innovation across the SDLC and accelerating delivery by **35%**
- Ensured regulatory compliance (FRB, FINRA, SEC) across mission-critical systems through architecture standards and governance frameworks

- Led global engineering teams (**30+ across US/UK/India**) driving **15% velocity improvement** through architectural clarity and platform standardization

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Architected consolidation of risk systems across structured products and mortgage trading lines of business, contributing to **~\$2B capital efficiency**
- Designed and delivered real-time pricing and analytics platforms, establishing reusable architectural patterns for downstream platform teams

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications, introducing modern design principles that reduced release cycles from monthly to weekly via CI/CD practices

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world enterprise applications, establishing architectural patterns for responsible and scalable AI adoption
- Applied ML for anomaly detection and operational intelligence across mission-critical trading platforms
- Driving AI-assisted SDLC workflows as an architectural standard, improving delivery speed and engineering quality across global teams

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Architecture: Enterprise architecture, reference architecture design, technology standards & design principles, cloud-native architecture (AWS, Kubernetes), event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime), platform modernization
AI & Data: GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB
Engineering: Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS
Leadership: Executive stakeholder management, global team leadership (30+ engineers), P&L ownership, strategic planning, program management, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance
Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
