PROFESSIONAL SUMMARY

Technology Risk and Control executive with 17+ years of experience embedding governance, regulatory compliance, and risk management frameworks across mission-critical capital markets and enterprise data platforms at Bank of America. Deep expertise identifying, assessing, and mitigating technology risk across distributed systems, trading platforms, and cloud-native infrastructure operating at \$1T+ daily processing scale. Proven track record partnering with senior stakeholders and regulators — including FRB, FINRA, and SEC — to ensure control effectiveness, audit readiness, and sustainable risk reduction. Combines broad architectural fluency with hands-on command of AI-enabled platforms to modernize risk and control environments for a rapidly evolving threat landscape.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Regulatory & Compliance Systems (FRB, FINRA, SEC) | Technology Risk Management & Control Frameworks | Platform Governance & Audit Readiness | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | Trading & Risk Platforms | AI & GenAI Platforms (RAG, Agentic AI) | Data Engineering (Spark, Databricks, ETL/ELT) | Executive Stakeholder Leadership | Global Team Leadership | SOX & ITIL Compliance | Platform Modernization

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Ensured regulatory compliance across mission-critical trading and risk systems, maintaining alignment with FRB, FINRA, and SEC requirements throughout enterprise-scale platform transformation
- Governed technology risk across platforms supporting **\$1T+ daily processing**, establishing control frameworks that sustained **99.97% uptime** across 50+ systems
- Led enterprise-scale platform transformation modernizing legacy systems into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), reducing systemic risk exposure and improving operational resilience
- Delivered real-time trading, pricing, and risk platforms improving throughput by **40%**, with embedded controls and monitoring to support audit and regulatory review
- Implemented ML-based anomaly detection and AI-assisted development workflows to strengthen operational intelligence and proactive risk identification

- Partnered with executive stakeholders across US, UK, and India to drive **15% velocity improvement** while maintaining governance standards across the global engineering organization

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation of risk systems contributing to **~\$2B capital efficiency**, designing control structures to support regulatory capital reporting and risk transparency
- Built real-time pricing and analytics platforms for structured products and mortgage trading, ensuring data integrity and compliance with applicable regulatory standards

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications with embedded compliance and audit controls
- Introduced CI/CD practices reducing release cycle from monthly to weekly, improving change management discipline and reducing deployment risk

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) to support intelligent risk identification and operational decision-making
- Applied ML for anomaly detection and operational intelligence across high-volume trading environments
- Driving AI-assisted SDLC workflows to improve delivery quality, reduce control gaps, and accelerate risk remediation

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Risk & Governance: Technology risk management, control frameworks, regulatory compliance (FRB, FINRA, SEC), SOX, ITIL, audit readiness, change management, program governance **Leadership:** Executive stakeholder management, global team leadership, P&L ownership, strategic planning, Agile, SDLC **Architecture:** Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime) **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
