PROFESSIONAL SUMMARY

Seasoned Technology Executive with 17+ years leading technology strategy, engineering organization growth, and large-scale platform transformation across capital markets and financial technology at Bank of America. Proven track record of defining and executing long-term architecture and scalability roadmaps, building and scaling high-performing global engineering teams, and delivering secure, reliable, high-performance financial systems supporting \$1T+ daily processing. Combines deep expertise in cloud-native distributed systems, event-driven platforms, and AI-enabled engineering with a hands-on approach to system design, technical decision-making, and executive stakeholder alignment to drive rapid business growth.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Technology Strategy & Scalability Roadmap | Platform Security & Reliability | Engineering Organization Leadership | Payment & Financial Technology Systems | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | AI & GenAI Platforms (RAG, Agentic AI) | Data Engineering (Spark, Databricks, ETL/ELT) | Regulatory & Compliance Systems (FRB, FINRA, SEC) | Executive Stakeholder Leadership | Global Team Leadership | Trading & Risk Platforms | Platform Modernization

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Defined and executed long-term technology strategy and architecture roadmap across trading and data systems supporting **\$1T+ daily processing**
- Built and scaled global engineering organization (**30+ engineers across US/UK/India**), driving talent development, performance management, and a **15% velocity improvement**
- Modernized legacy systems into secure, cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), achieving **99.97% uptime** across mission-critical financial platforms
- Delivered real-time trading, pricing, and risk platforms improving throughput by **40%** and reducing costs by **30%**
- Maintained hands-on involvement in system design, technical decision-making, and engineering execution across distributed, high-availability platforms
- Implemented AI-assisted development workflows and ML-based anomaly detection, accelerating delivery speed and improving operational intelligence
- Ensured platform security and regulatory compliance (FRB, FINRA, SEC) across all mission-critical systems

- Collaborated with executive leadership to align technology initiatives with business objectives and growth plans

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation and modernization of risk and pricing systems contributing to ~\$2B capital efficiency
- Built real-time pricing and analytics platforms for structured products and mortgage trading, delivering high-performance, reliable financial technology systems
- Aligned technology execution with business growth objectives across structured finance and mortgage trading desks

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications underpinning mission-critical financial operations
- Introduced CI/CD practices reducing release cycle from monthly to weekly, establishing a foundation for scalable engineering delivery

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world financial technology applications
- Applied ML for anomaly detection and operational intelligence across high-volume trading and risk platforms
- Driving AI-assisted SDLC workflows improving engineering delivery speed, quality, and team productivity

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Technology strategy & roadmap execution, engineering organization scaling, talent acquisition & performance management, executive stakeholder management, global team leadership (30+ engineers), P&L ownership, strategic planning, program management, Agile, ITIL, SDLC

Architecture: Cloud-native architecture (AWS, Kubernetes), enterprise & system architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime), platform security & reliability, scalability design

Compliance & Security: SOX, FRB, FINRA, SEC regulatory compliance, platform security frameworks

AI & Data: GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB

Engineering: Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS

Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
