PROFESSIONAL SUMMARY

Technology Risk and Governance executive with 17+ years driving enterprise-scale platform resilience, regulatory compliance, and controls modernization across capital markets at Bank of America. Deep expertise establishing and enforcing governance frameworks aligned to FRB, FINRA, and SEC mandates across mission-critical, high-availability systems processing \$1T+ daily. Proven ability to partner with senior stakeholders to embed secure, scalable, and resilient architecture standards while accelerating delivery through AI-enabled engineering workflows. Combines strategic program leadership with hands-on technical depth in cloud-native, event-driven, and distributed systems to advance intelligent, risk-aware technology organizations.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Regulatory & Compliance Governance (FRB, FINRA, SEC, SOX) | Technology Risk & Controls Frameworks | Cloud-Native Architecture (AWS, Kubernetes) | High-Availability & Resilient Platform Design | Event-Driven Systems (Kafka) | AI & GenAI Platforms (RAG, Agentic AI) | Executive Stakeholder Leadership | Platform Modernization & Transformation | Data Engineering (Spark, Databricks, ETL/ELT) | Trading & Risk Platforms | Global Team Leadership | SDLC, Agile & ITIL Governance

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Ensured regulatory compliance across FRB, FINRA, and SEC mandates for mission-critical trading and risk platforms processing **\$1T+ daily**, embedding controls governance into every layer of the technology stack
- Established and enforced technology governance standards across cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), driving **99.97% uptime** across **50+ systems**
- Led enterprise-scale platform transformation delivering secure, scalable, and resilient infrastructure aligned to risk and controls frameworks
- Delivered real-time trading, pricing, and risk platforms improving throughput by **40%**, with ML-based anomaly detection strengthening operational intelligence and controls monitoring
- Implemented AI-assisted development workflows improving delivery velocity by **35%** while maintaining rigorous SDLC governance and quality controls
- Partnered with executive stakeholders across business, risk, and compliance functions to align technology strategy with regulatory and governance priorities

- Built and led global engineering teams (**30+ across US/UK/India**) driving **15% velocity improvement** through structured Agile and ITIL delivery practices

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation of risk and controls systems contributing to **~\$2B capital efficiency**, rationalizing governance across structured products and mortgage trading platforms
- Built real-time pricing and analytics platforms for structured products and mortgage trading, ensuring compliance with applicable regulatory reporting requirements
- Drove risk platform modernization initiatives improving auditability, traceability, and controls coverage across the technology estate

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications with embedded controls and audit capabilities
- Introduced CI/CD practices reducing release cycle from monthly to weekly, improving governance over deployment risk

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) to enhance operational intelligence and risk-aware decision support
- Applied ML for anomaly detection and operational controls monitoring across high-availability trading infrastructure
- Driving AI-assisted SDLC workflows that improve delivery speed and quality while maintaining governance and compliance standards

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Governance & Risk: Technology risk frameworks, regulatory compliance (FRB, FINRA, SEC, SOX), controls governance, audit readiness, ITIL, SDLC governance, Agile program management, executive stakeholder management, strategic planning **Architecture:** Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime), resilient platform design **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
