PROFESSIONAL SUMMARY

AI/ML Strategy Director with 17+ years translating complex business objectives into end-to-end AI, data, and technology solutions across capital markets and enterprise platforms at Bank of America. Deep expertise in GenAI (RAG pipelines, agentic AI), ML-based intelligence systems, and cloud-native architecture — with a proven record of defining value-first implementation roadmaps that deliver measurable outcomes at scale. Combines hands-on technical depth in distributed systems, data engineering, and event-driven platforms with executive stakeholder leadership to guide technology choices from presales through production delivery. Experienced driving AI-assisted SDLC workflows, data governance, and regulatory compliance across mission-critical financial systems.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

AI & GenAI Platforms (RAG, Agentic AI) | ML Strategy & Implementation Roadmaps | Data Engineering & Governance (Spark, Databricks, Snowflake, ETL/ELT) | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | Application Integration & Distributed Systems | Trading & Risk Platforms | Platform Modernization | Executive Stakeholder Leadership | Regulatory & Compliance Systems (FRB, FINRA, SEC, SOX)

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Translated business objectives into end-to-end AI and data platform strategies, implementing GenAI workflows and ML-based anomaly detection that improved delivery speed by **35%** and productivity by **45%**
- Defined value-first implementation roadmaps modernizing legacy systems into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), supporting **\$1T+ daily processing**
- Guided technology choices across distributed systems and data engineering platforms, delivering real-time trading, pricing, and risk solutions with **40% throughput improvement**
- Built and drove AI-assisted SDLC workflows, integrating ML-based operational intelligence across mission-critical capital markets platforms
- Ensured regulatory compliance (FRB, FINRA, SEC, SOX) across all platform transformations, embedding governance and controls into architecture from design through production delivery
- Led global engineering teams across US/UK/India, driving **15% velocity improvement** through Agile and program management best practices

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Defined and executed data and analytics platform strategy for structured products and mortgage trading, contributing to ~\$2B capital efficiency through risk system consolidation
- Built real-time pricing and analytics platforms, translating complex trading desk requirements into scalable, production-grade technology solutions

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications, establishing integration patterns adopted across the platform
- Introduced CI/CD practices reducing release cycle from monthly to weekly, accelerating production delivery cadence

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms leveraging RAG pipelines and agentic AI systems for real-world, production-scale applications
- Applied ML for anomaly detection and operational intelligence across enterprise financial platforms
- Driving AI-assisted SDLC workflows that measurably improve delivery speed, quality, and engineering productivity

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Strategy & Leadership: AI/ML strategy, value-first implementation roadmaps, executive stakeholder management, P&L ownership, strategic planning, program management, Agile, ITIL, SOX, FRB/FINRA/SEC compliance **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, data governance, Spark, Databricks, Snowflake, ETL/ELT, Hadoop, Cassandra, MongoDB **Architecture:** Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, application integration, high-availability platforms (99.97% uptime) **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
