PROFESSIONAL SUMMARY

Technology executive with 17+ years of experience leading enterprise-wide resilience, business continuity, and platform transformation programs across mission-critical financial systems at Bank of America. Proven ability to develop and implement comprehensive crisis management frameworks, regulatory compliance programs, and high-availability recovery architectures that sustain operations at enterprise scale. Deep expertise integrating information technology resilience, disaster recovery, and operational continuity disciplines into cohesive, organization-wide capabilities. Combines strategic program leadership with hands-on technical depth to drive measurable outcomes across complex, regulated environments.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Enterprise Resilience & Business Continuity | Crisis Management & Incident Response | High-Availability Platform Architecture (99.97% uptime) | Regulatory & Compliance Programs (FRB, FINRA, SEC, SOX) | IT Resilience & Disaster Recovery | Program Management & Strategic Planning | Executive Stakeholder Leadership | Global Team Leadership | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | AI & GenAI Platforms (RAG, Agentic AI) | Data Engineering (Spark, Databricks, ETL/ELT)

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Sustained **99.97% uptime** across mission-critical trading and risk platforms processing **\$1T+ daily**, establishing enterprise-grade resilience and recovery standards
- Ensured continuous regulatory compliance (FRB, FINRA, SEC) across mission-critical systems, embedding compliance frameworks into platform operations and change management processes
- Led enterprise-scale platform transformation across trading and data systems, coordinating recovery architecture, business continuity planning, and operational risk mitigation
- Modernized legacy systems into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), improving fault tolerance, failover capability, and system recoverability
- Implemented ML-based anomaly detection to enable proactive operational intelligence and early identification of system degradation and business interruption risk
- Built and led global engineering teams (**30+ across US/UK/India**), driving cross-functional collaboration across geographies and business units to maintain continuity of operations
- Delivered real-time trading, pricing, and risk platforms improving throughput by **40%**, reducing operational exposure and business interruption risk

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation of risk systems contributing to ~\$2B capital efficiency, requiring rigorous continuity planning and cross-system recovery coordination
- Built real-time pricing and analytics platforms for structured products and mortgage trading, incorporating high-availability design and operational resilience requirements

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications with embedded reliability and recovery capabilities
- Introduced CI/CD practices reducing release cycle from monthly to weekly, strengthening change management discipline and reducing business interruption risk from deployments

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) to support operational intelligence and enterprise decision-making
- Applied ML for anomaly detection and operational intelligence, enabling proactive identification of system and business continuity risks
- Driving AI-assisted SDLC workflows improving delivery speed, quality, and resilience of enterprise platforms

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, global team leadership (30+ engineers), strategic planning, program management, crisis coordination, P&L ownership, SDLC, Agile, ITIL **Resilience & Compliance:** Business continuity planning, IT resilience & disaster recovery, high-availability architecture (99.97% uptime), SOX, FRB/FINRA/SEC regulatory compliance, incident response, change management **Architecture:** Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, fault-tolerant platform design **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
