

ARUN ARUNACHALAM

Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

Digital Architect with 17+ years of hands-on platform design and end-to-end delivery across cloud-native, event-driven, and AI-enabled systems, with deep roots in capital markets and enterprise data engineering. Trusted technical advisor to VP and Director-level stakeholders, combining architectural authority with codebase credibility to drive measurable business outcomes. Brings a forward-looking perspective on how GenAI and agentic AI capabilities are reshaping intelligent digital platforms, with applied experience building RAG pipelines and agentic systems. Proven track record modernizing legacy infrastructure into distributed, high-availability architectures on AWS and Kubernetes at enterprise scale.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

AI & GenAI Platforms (RAG, Agentic AI) | Cloud-Native Architecture (AWS, Kubernetes) | End-to-End Digital Architecture & Delivery | Event-Driven Systems (Kafka) | Distributed Systems & High-Availability Platforms | Data Engineering (Spark, Databricks, ETL/ELT) | Executive & VP/Director-Level Stakeholder Advisory | Platform Modernization & Legacy Transformation | Trading & Risk Platforms | Regulatory & Compliance Systems

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Owned end-to-end architecture and delivery of enterprise-scale digital platforms supporting **\$1T+ daily processing**, serving as primary technical advisor to VP and Director-level leadership
- Modernized legacy infrastructure into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), delivering **40% throughput improvement** across trading, pricing, and risk systems
- Designed and deployed distributed, high-availability platforms scaled from 10 to **50+ systems** at **99.97% uptime**
- Built and operationalized GenAI platforms including RAG pipelines and agentic AI systems, driving **35% faster delivery** and **45% productivity gain** through AI-assisted SDLC workflows
- Applied ML-based anomaly detection for operational intelligence across mission-critical data pipelines
- Ensured regulatory compliance (FRB, FINRA, SEC) across all platform domains
- Led global engineering teams across US, UK, and India, driving **15% velocity improvement**

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Architected and delivered real-time pricing and analytics platforms for structured products and mortgage trading, contributing to ~\$2B capital efficiency through risk system consolidation
- Designed distributed data pipelines and event-driven integrations supporting high-volume trading operations

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications, establishing foundational platform patterns still in use across downstream systems
- Introduced CI/CD practices reducing release cycle from monthly to weekly, accelerating delivery velocity

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world enterprise applications, with a forward-looking perspective on how agentic capabilities are reshaping intelligent digital commerce
- Applied ML for anomaly detection and operational intelligence across large-scale data platforms
- Driving AI-assisted SDLC workflows improving delivery speed, quality, and engineering productivity

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Architecture: Cloud-native architecture (AWS, Kubernetes), end-to-end digital architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime), enterprise architecture, platform modernization

AI & Data: GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB

Engineering: Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS

Leadership: Executive and VP/Director-level stakeholder advisory, global team leadership, P&L ownership, strategic planning, program management, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance

Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
