Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

Technology executive with 17+ years architecting and scaling enterprise resiliency, high-availability platforms, and mission-critical infrastructure across capital markets at Bank of America. Proven track record setting strategic direction and operating models for large-scale platform transformation, ensuring alignment with regulatory expectations (FRB, FINRA, SEC) and long-term technology strategy. Deep expertise in cloud-native architecture, event-driven distributed systems, and enterprise risk platforms supporting \$1T+ daily processing at 99.97% uptime. Combines executive stakeholder leadership with hands-on architectural depth to drive resiliency, compliance, and continuous operational improvement across global engineering organizations.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

High-Availability & Enterprise Resiliency | Cloud-Native Architecture (AWS, Kubernetes) | Regulatory & Compliance Systems (FRB, FINRA, SEC) | Event-Driven Systems (Kafka) | Platform Modernization & Transformation | Distributed Systems Engineering | Trading & Risk Platforms | Executive Stakeholder Leadership | Global Team Leadership | AI & GenAI Platforms (RAG, Agentic AI) | Data Engineering (Spark, Databricks, ETL/ELT) | SOX / ITIL / Agile

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Established and executed enterprise-scale platform resiliency strategy across trading and data systems supporting **\$1T+ daily processing**, maintaining **99.97% uptime** across mission-critical infrastructure
- Set strategic direction and operating model for cloud-native, event-driven architecture modernization (AWS, Kafka, Kubernetes), ensuring alignment with regulatory expectations (FRB, FINRA, SEC)
- Delivered real-time trading, pricing, and risk platforms with **40% throughput improvement**, directly strengthening operational resilience and business continuity
- Ensured regulatory compliance across mission-critical systems, partnering with risk, audit, and compliance stakeholders to meet FRB, FINRA, and SEC requirements
- Scaled platform footprint from 10 to **50+ systems** while sustaining high-availability SLAs and minimizing operational risk
- Led enterprise transformation program valued at **\$8M**, achieving **30% cost reduction** through infrastructure optimization and resiliency-driven architectural decisions

- Built and led global engineering organizations (**30+ across US/UK/India**), driving **15% velocity improvement** through Agile and ITIL-aligned delivery practices
- Implemented ML-based anomaly detection and AI-assisted development workflows to proactively identify operational risk and accelerate incident response

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation and modernization of risk systems contributing to **~\$2B capital efficiency**, improving platform stability and reducing systemic risk exposure
- Built real-time pricing and analytics platforms for structured products and mortgage trading, establishing resilient, high-availability architecture patterns adopted across the organization

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications with a focus on reliability and operational continuity
- Introduced CI/CD practices reducing release cycle from monthly to weekly, improving deployment resiliency and reducing change-related risk

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world operational and engineering applications
- Applied ML for anomaly detection and operational intelligence, strengthening proactive resiliency monitoring
- Driving AI-assisted SDLC workflows improving delivery speed, quality, and incident response capabilities

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, global team leadership, strategic planning, operating model design, program management, P&L ownership, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance **Architecture:** High-availability platforms (99.97% uptime), cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, platform resiliency **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
