PROFESSIONAL SUMMARY

Transformational technology executive with 17+ years driving multi-year platform modernization, data strategy, and AI-enabled decision support across capital markets and enterprise finance systems at Bank of America. Proven track record defining and executing transformation roadmaps that deliver measurable improvements in productivity, cycle time, and reporting quality — translating complex data and AI capabilities into tangible business outcomes. Deep expertise in cloud-native architecture, GenAI platforms (RAG pipelines, agentic AI), and event-driven data systems, combined with a strong record of partnering with senior finance and business stakeholders to drive change management and adoption at scale. Adept at owning product roadmaps, shaping key design decisions, and overseeing end-to-end delivery of new capabilities across global organizations.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

AI & GenAI Platforms (RAG, Agentic AI) | Finance & Data Transformation Strategy | Multi-Year Roadmap Ownership | Analytics & Decision Support Platforms | Data Engineering (Spark, Databricks, ETL/ELT) | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | Change Management & Stakeholder Adoption | Executive Stakeholder Leadership | Regulatory & Compliance Systems (FRB, FINRA, SEC) | Trading & Risk Platforms | Global Team Leadership

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Defined and executed multi-year enterprise transformation roadmap modernizing trading and data platforms supporting **\$1T+ daily processing**, delivering measurable improvements in throughput, cycle time, and reporting quality
- Owned product roadmap and shaped key design decisions across cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), driving **40% performance improvement** and **30% cost reduction**
- Implemented AI-assisted development workflows and ML-based anomaly detection, accelerating delivery speed by **35%** and improving operational decision support
- Built and deployed GenAI platforms (RAG pipelines, agentic AI) to automate and enhance analytical workflows, enabling intelligent decision systems across the organization
- Partnered closely with executive finance and business stakeholders to drive change management and adoption of new data and AI capabilities across global teams

- Delivered real-time analytics, pricing, and risk platforms improving throughput by **40%** and enabling data-driven decision-making at scale
- Led data engineering initiatives leveraging Spark, Databricks, and ETL/ELT pipelines to modernize data infrastructure and improve reporting quality
- Ensured regulatory compliance (FRB, FINRA, SEC) across mission-critical finance and risk systems
- Built and led global engineering teams (**30+ across US/UK/India**) driving **15% velocity improvement**

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation and modernization of risk and analytics platforms contributing to **~\$2B capital efficiency**, demonstrating measurable business impact from data and technology transformation
- Built real-time pricing and analytics platforms for structured products and mortgage trading, improving cycle time and decision support for finance stakeholders
- Partnered with finance and trading communities to align platform capabilities with business reporting and analytical requirements

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications, establishing foundational data and automation capabilities
- Introduced CI/CD practices reducing release cycle from monthly to weekly, improving delivery velocity and platform reliability

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) to automate analytical workflows and enhance decision support for finance and operations stakeholders
- Applied ML for anomaly detection and operational intelligence, improving data quality and reporting accuracy
- Driving AI-assisted SDLC workflows delivering **35% faster delivery** and **45% productivity gain** — directly applicable to FP&A automation and cycle time reduction

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, transformation roadmap ownership, change management & adoption, global team leadership (30+ engineers), P&L ownership, strategic planning, program management, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance

Architecture: Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime)

AI & Data: GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, analytics & decision support platforms, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB

Engineering: Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS

Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
