Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

Data-driven technology executive with 17+ years leading enterprise platform transformation across capital markets and data systems at Bank of America, with deep expertise in data governance, data engineering, and analytics platform modernization. Proven ability to define and deliver data products at scale — translating complex regulatory and business requirements into cloud-native, event-driven architectures that drive measurable outcomes across global organizations. Combines hands-on experience in GenAI, ML, and AI-assisted delivery with executive stakeholder leadership to challenge traditional approaches and foster continuous innovation. Adept at aligning cross-functional teams across business, technology, and compliance to build groundbreaking data solutions that address customer and enterprise needs.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Data Governance & Data Product Management | AI & GenAI Platforms (RAG, Agentic AI) | Cloud-Native Architecture (AWS, Kubernetes) | Data Engineering (Spark, Databricks, ETL/ELT) | Event-Driven Systems (Kafka) | Regulatory & Compliance Systems (FRB, FINRA, SEC, SOX) | Executive Stakeholder Leadership | Trading & Risk Platforms | Platform Modernization | Global Team Leadership

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Governed and modernized enterprise data systems supporting **\$1T+ daily processing**, enforcing data quality, lineage, and compliance standards across mission-critical platforms
- Defined and delivered data product roadmaps across trading, pricing, and risk domains — aligning cross-functional business, technology, and regulatory stakeholders to shared outcomes
- Modernized legacy data infrastructure into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), improving data throughput and platform reliability to **99.97% uptime**
- Implemented AI-assisted development workflows and ML-based anomaly detection to improve data quality monitoring and operational intelligence
- Ensured regulatory compliance (FRB, FINRA, SEC, SOX) across mission-critical data and trading systems, embedding governance controls into platform design
- Delivered real-time trading, pricing, and risk platforms improving throughput by **40%**
- Built and led global engineering teams (**30+ across US/UK/India**) driving **15% velocity improvement** through Agile and continuous delivery practices

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation of risk and data systems across structured products and mortgage trading, contributing to ~\$2B capital efficiency through improved data accuracy and platform integration
- Built real-time pricing and analytics platforms, establishing data standards and governance frameworks across structured products and mortgage trading desks
- Partnered with business and quantitative teams to translate complex analytical requirements into scalable data product features

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications with embedded data validation and lineage controls
- Introduced CI/CD practices reducing release cycle from monthly to weekly, accelerating data product delivery cadence

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) to enable intelligent data discovery, lineage automation, and operational decision support
- Applied ML for anomaly detection and operational intelligence across enterprise data pipelines
- Driving AI-assisted SDLC workflows improving delivery speed, data quality, and engineering productivity

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, data product ownership, cross-functional team leadership, strategic planning, program management, Agile, ITIL, SOX, FRB/FINRA/SEC compliance, P&L ownership **Data Governance & Architecture:** Data governance frameworks, data lineage, data quality, regulatory data compliance, cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime) **AI & Data Engineering:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
