---

## PROFESSIONAL SUMMARY

---

Technology infrastructure professional with 17+ years of experience designing, implementing, and maintaining enterprise-scale, high-availability systems supporting mission-critical operations across distributed, multi-site environments. Proven track record securing and modernizing complex infrastructure — including cloud-native, event-driven, and distributed platforms — while ensuring regulatory compliance and operational resilience. Experienced collaborating across technical teams, vendors, and executive stakeholders to deliver scalable, secure, and reliable infrastructure solutions. Brings deep hands-on expertise in enterprise architecture, systems reliability, and infrastructure transformation to support demanding operational environments.

## SIGNATURE IMPACT

---

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

## CORE CAPABILITIES

---

Cloud-Native & Enterprise Architecture (AWS, Kubernetes) | High-Availability & Resilient Infrastructure (99.97% uptime) | Distributed Systems Design & Implementation | Event-Driven Systems (Kafka) | Security & Regulatory Compliance (FRB, FINRA, SEC, SOX) | Multi-Site & Remote Infrastructure Support | Vendor & Stakeholder Collaboration | Platform Modernization & Legacy Migration | Data Engineering (Spark, Databricks, ETL/ELT) | AI & GenAI Platforms (RAG, Agentic AI)

## PROFESSIONAL EXPERIENCE

---

### **Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)**

- Designed and maintained enterprise-scale infrastructure supporting **\$1T+ daily processing** across distributed, multi-site environments with **99.97% uptime**
- Modernized legacy systems into cloud-native, secure, and resilient architecture (AWS, Kafka, Kubernetes) across global facilities
- Delivered high-availability trading, pricing, and risk platforms improving throughput by **40%** while maintaining mission-critical operational continuity
- Ensured regulatory compliance (FRB, FINRA, SEC, SOX) across all infrastructure and systems, aligning with security and governance standards
- Collaborated across global engineering teams (US/UK/India), vendors, and executive stakeholders to deliver scalable infrastructure solutions
- Implemented ML-based anomaly detection and AI-assisted workflows to improve operational intelligence and infrastructure reliability
- Drove **15% velocity improvement** through process modernization and cross-functional coordination

## **Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)**

- Designed and delivered real-time, high-availability analytics and pricing platforms supporting mission-critical trading operations
- Led consolidation of risk infrastructure contributing to ~\$2B **capital efficiency**, requiring coordination across multiple systems and teams
- Built resilient, scalable platforms for structured products and mortgage trading with strict uptime and performance requirements

## **Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)**

- Architected and delivered end-to-end enterprise Java EE applications supporting trading desk operations
- Introduced CI/CD practices reducing release cycle from monthly to weekly, improving infrastructure reliability and deployment consistency

## **Senior Programmer Analyst — Knight Trading (2004)**

## **DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)**

## **Sr. Java Web Developer — Mellon Investor Services (2001)**

## **Sr. Java GUI Developer — Thomson Financials (2001)**

## **Sr. Java GUI Developer — Icor Brokerage (2000)**

## **AI & INNOVATION**

---

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world operational applications
- Applied ML for anomaly detection and operational intelligence across enterprise infrastructure
- Driving AI-assisted SDLC workflows improving delivery speed, quality, and infrastructure reliability

## **EDUCATION**

---

**Bachelor of Technology** — Anna University

## **SKILLS**

---

**Infrastructure & Architecture:** Cloud-native architecture (AWS, Kubernetes), enterprise architecture, distributed systems, high-availability platforms (99.97% uptime), event-driven systems (Kafka), multi-site infrastructure support **Security & Compliance:** FRB, FINRA, SEC, SOX compliance; regulatory governance; secure systems design; ITIL **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Leadership & Collaboration:** Executive stakeholder management, cross-functional vendor collaboration, global team coordination, strategic planning, program management, Agile, SDLC **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
