

ARUN ARUNACHALAM

Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

Senior technology executive with 17+ years of enterprise-scale platform transformation experience, uniquely positioned to lead end-to-end technology integration programs across complex, multi-system environments. Proven track record of consolidating and standardizing legacy infrastructure into cloud-native, secure, and operationally resilient platforms — delivering measurable outcomes in performance, cost efficiency, and compliance. Deep expertise in enterprise architecture, operating model design, and regulatory alignment (FRB, FINRA, SEC) across capital markets and data systems. Combines executive stakeholder leadership with hands-on architectural depth to drive integration programs from strategy through execution.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Platform Consolidation & Technology Integration | Enterprise Architecture & Standardization | Cloud-Native Infrastructure (AWS, Kubernetes) | Operating Model Design & Transformation | Regulatory & Compliance Systems (FRB, FINRA, SEC, SOX) | Executive Stakeholder Leadership | Global Team Leadership | Event-Driven Systems (Kafka) | AI & GenAI Platforms (RAG, Agentic AI) | Data Engineering (Spark, Databricks, ETL/ELT) | Program Management & SDLC | High-Availability Platform Delivery (99.97% uptime)

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Led enterprise-scale platform consolidation and transformation across trading and data systems, standardizing architecture across **50+ systems** supporting **\$1T+ daily processing**
- Drove end-to-end technology integration of legacy infrastructure into a centralized, cloud-native, event-driven environment (AWS, Kafka, Kubernetes), establishing standardized operating models across global teams
- Defined and enforced enterprise architecture standards, security posture, and compliance frameworks aligned to FRB, FINRA, and SEC requirements across mission-critical platforms
- Delivered real-time trading, pricing, and risk platforms improving throughput by **40%** and reducing operational costs by **30%** through infrastructure rationalization
- Designed and implemented high-availability platform architecture sustaining **99.97% uptime** across distributed, multi-region environments
- Built and led global engineering teams (**30+ across US/UK/India**), establishing unified delivery operating models and driving **15% velocity improvement**

- Implemented AI-assisted development workflows and ML-based anomaly detection to improve operational intelligence and support capabilities

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation of risk systems across structured products and mortgage trading platforms, contributing to **~\$2B capital efficiency** through standardization and rationalization of redundant infrastructure
- Built real-time pricing and analytics platforms for structured products and mortgage trading, integrating disparate systems into a unified, centralized technology environment
- Partnered with executive stakeholders to align technology integration roadmaps with business and regulatory priorities

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications, consolidating fragmented desk-level tools into standardized enterprise platforms
- Introduced CI/CD practices that standardized the release operating model, reducing release cycle from monthly to weekly and improving platform stability

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) to accelerate integration workflows and enable intelligent operational decision systems
- Applied ML for anomaly detection and operational intelligence across mission-critical infrastructure
- Driving AI-assisted SDLC workflows improving delivery speed, quality, and integration program execution

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, global team leadership (30+ engineers), P&L ownership, strategic planning, program management, operating model design, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance **Architecture:** Cloud-native architecture (AWS, Kubernetes), enterprise architecture, platform consolidation & standardization, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime) **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
