

ARUN ARUNACHALAM

Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

Technology executive with 17+ years of experience designing and operating high-availability, mission-critical infrastructure across cloud-native and on-premises environments in financial services. Deep expertise in AWS-hosted and on-prem platform architecture, ensuring 24x7 availability of enterprise systems through redundant, fault-tolerant design patterns. Proven track record delivering sound engineering practices across distributed systems, load-balanced platforms, and event-driven infrastructure supporting \$1T+ daily processing. Experienced collaborating across global IT teams to drive platform reliability, operational excellence, and compliance with regulatory standards including FRB, FINRA, and SEC.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Cloud-Native & On-Prem Architecture (AWS, Kubernetes) | High-Availability & Redundant Platform Design | Distributed Systems Engineering | Event-Driven Infrastructure (Kafka) | Mission-Critical Platform Operations (99.97% Uptime) | Data Engineering (Spark, Databricks, ETL/ELT) | AI & GenAI Platforms (RAG, Agentic AI) | Trading & Risk Platforms | Regulatory & Compliance Systems (FRB, FINRA, SEC) | Global IT Collaboration & Stakeholder Leadership

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Architected and operated cloud-native, on-premises, and hybrid infrastructure supporting **\$1T+ daily processing** with **99.97% uptime** across mission-critical trading and risk platforms
- Modernized legacy systems into redundant, fault-tolerant architectures using AWS, Kafka, and Kubernetes, ensuring 24x7 availability of enterprise applications
- Delivered real-time trading, pricing, and risk platforms with **40% throughput improvement** through sound engineering and best-practice redundant design
- Ensured regulatory compliance (FRB, FINRA, SEC) across all mission-critical infrastructure and platform operations
- Implemented ML-based anomaly detection and AI-assisted workflows to improve operational intelligence and platform reliability
- Collaborated across global engineering teams (**US/UK/India**) to align infrastructure delivery with enterprise IT standards and drive **15% velocity improvement**

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Built and operated real-time pricing and analytics platforms for structured products and mortgage trading, ensuring high availability and performance under peak load conditions

- Led consolidation of risk systems across on-premises environments, contributing to ~\$2B **capital efficiency** through architectural simplification and redundancy improvements

Bank of America — AVP, Whole Loan Trading Desk Support (*prior to 2011*)

- Architected and delivered end-to-end Java EE trading support applications on enterprise infrastructure
- Introduced CI/CD practices reducing release cycle from monthly to weekly, improving platform stability and deployment reliability

Senior Programmer Analyst — Knight Trading (*2004*)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (*2003*)

Sr. Java Web Developer — Mellon Investor Services (*2001*)

Sr. Java GUI Developer — Thomson Financials (*2001*)

Sr. Java GUI Developer — Icor Brokerage (*2000*)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world operational applications
- Applied ML for anomaly detection and operational intelligence across enterprise infrastructure
- Driving AI-assisted SDLC workflows improving delivery speed, quality, and platform reliability

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Architecture: Cloud-native architecture (AWS, Kubernetes), high-availability and redundant platform design, distributed systems, event-driven infrastructure (Kafka), on-premises and hybrid environments, enterprise architecture, 99.97% uptime operations **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Leadership:** Executive stakeholder management, global IT collaboration, P&L ownership, strategic planning, program management, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
