PROFESSIONAL SUMMARY

AI-driven technology executive with 17+ years of experience owning the vision, strategy, and delivery of AI and data platforms at enterprise scale. Proven track record of transforming AI ambition into adopted, value-creating capabilities across large, complex organizations — combining deep expertise in GenAI (RAG pipelines, agentic AI), cloud-native architecture, and data engineering with the executive stakeholder leadership required to align multi-disciplinary teams around measurable business outcomes. Experienced leading portfolios of AI and data initiatives from concept through delivery, driving adoption and operational intelligence across mission-critical platforms. Brings hands-on technical depth alongside the strategic and program management acumen to accelerate an organization's AI transformation at scale.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

AI & GenAI Platforms (RAG, Agentic AI) | AI Transformation Strategy & Delivery | Data Engineering (Spark, Databricks, ETL/ELT) | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | Platform Modernization & Adoption | Executive Stakeholder Leadership | Global Team Leadership | Regulatory & Compliance Systems | Trading & Risk Platforms

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Owned vision and delivery of AI and data platform initiatives across enterprise-scale trading and data systems supporting **\$1T+ daily processing**, translating strategic AI ambition into adopted, value-creating capabilities
- Implemented AI-assisted development workflows and ML-based anomaly detection, achieving **35% faster delivery** and **45% productivity gain** — demonstrating measurable adoption and business value from AI transformation
- Modernized legacy systems into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), driving **40% throughput improvement** and **30% cost reduction** across a portfolio of **50+ platforms**
- Led enterprise-scale data engineering initiatives leveraging Spark, Databricks, and ETL/ELT pipelines to enable real-time intelligence and operational decision-making
- Built and led global, multi-disciplinary engineering teams (**30+ across US/UK/India**), driving **15% velocity improvement** through Agile delivery and strategic program management

- Ensured regulatory compliance (FRB, FINRA, SEC) across mission-critical systems, balancing innovation velocity with governance and risk management

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation and transformation of risk and analytics platforms contributing to ~\$2B **capital efficiency**, demonstrating ability to connect technology delivery to large-scale business outcomes
- Built real-time pricing and analytics platforms for structured products and mortgage trading, establishing data-driven decision capabilities across the commercial organization
- Partnered with executive stakeholders to align technology strategy with business priorities across sales, trading, and risk functions

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications, establishing foundational platforms later scaled across the enterprise
- Introduced CI/CD practices reducing release cycle from monthly to weekly, accelerating delivery adoption across engineering teams

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world enterprise applications, with focus on delivery, adoption, and measurable value creation
- Applied ML for anomaly detection and operational intelligence across large-scale data platforms
- Driving AI-assisted SDLC workflows that improve delivery speed, quality, and team productivity at scale

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, AI transformation strategy, global team leadership (30+ engineers), P&L ownership, strategic planning, program management, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance

AI & Data: GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB

Architecture: Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime)

Engineering: Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS

Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
