PROFESSIONAL SUMMARY

Technology executive with 17+ years architecting and delivering low-latency, high-throughput electronic trading platforms across capital markets at Bank of America. Deep expertise in event-driven, cloud-native systems — including real-time trading, pricing, and risk platforms processing \$1T+ daily — built on distributed architectures spanning AWS, Kafka, and Kubernetes. Proven record modernizing legacy trading infrastructure into resilient, high-availability platforms with 99.97% uptime while driving measurable performance gains and regulatory compliance across FRB, FINRA, and SEC frameworks. Combines hands-on engineering depth in Java and distributed systems with executive-level delivery across global, cross-functional teams in fast-paced capital markets environments.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Electronic Trading & Low-Latency Platforms | Event-Driven Systems (Kafka) | Cloud-Native Architecture (AWS, Kubernetes) | Distributed Systems & High-Throughput Architecture | Real-Time Pricing & Risk Platforms | Trading & Capital Markets Technology | AI & GenAI Platforms (RAG, Agentic AI) | Data Engineering (Spark, Databricks, ETL/ELT) | Platform Modernization | Regulatory & Compliance Systems (FRB, FINRA, SEC) | Executive Stakeholder Leadership | Global Team Leadership

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Delivered real-time trading, pricing, and risk platforms improving throughput by **40%**, supporting **\$1T+ daily processing**
- Modernized legacy trading infrastructure into cloud-native, event-driven architecture leveraging AWS, Kafka, and Kubernetes — achieving **99.97% uptime** across mission-critical systems
- Led enterprise-scale platform transformation spanning electronic trading and data systems across capital markets
- Implemented AI-assisted development workflows and ML-based anomaly detection to improve platform operational intelligence
- Ensured end-to-end regulatory compliance (FRB, FINRA, SEC) across high-availability, mission-critical trading systems
- Built and led global engineering teams (30+ across US/UK/India) driving **15% velocity improvement** across the SDLC

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Built real-time pricing and analytics platforms for structured products and mortgage trading, contributing to ~\$2B capital efficiency
- Led consolidation of risk systems across trading desks, improving platform performance and reducing operational overhead
- Delivered high-throughput, low-latency analytics capabilities supporting active trading workflows

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications for the whole loan trading desk
- Introduced CI/CD practices reducing release cycle from monthly to weekly, accelerating time-to-market for trading platform enhancements

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world capital markets applications
- Applied ML for anomaly detection and operational intelligence across trading and risk platforms
- Driving AI-assisted SDLC workflows improving delivery speed and quality across engineering teams

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Architecture: Cloud-native architecture (AWS, Kubernetes), event-driven systems (Kafka), distributed systems, low-latency and high-throughput trading platforms, high-availability platforms (99.97% uptime), enterprise architecture **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Leadership:** Executive stakeholder management, global team leadership (30+ engineers), P&L ownership, strategic planning, program management, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
