---

## PROFESSIONAL SUMMARY

---

Technology executive with 17+ years of experience in cloud-native architecture, AI platforms, and enterprise risk systems across capital markets at Bank of America, with deep expertise in assessing and strengthening control environments for large-scale cloud and AI expansion efforts. Proven track record evaluating regulatory compliance (FRB, FINRA, SEC) across mission-critical distributed systems processing \$1T+ daily, with hands-on command of AWS, Kubernetes, Kafka, and GenAI platforms including RAG pipelines and agentic AI. Combines architectural depth in cloud-native and event-driven systems with a rigorous risk-focused mindset honed through enterprise-scale platform modernization and regulatory oversight. Brings the subject matter expertise and communication skills to support high-standard cloud audit capabilities aligned with professional and departmental standards.

## SIGNATURE IMPACT

---

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

## CORE CAPABILITIES

---

Cloud-Native Architecture (AWS, Kubernetes) | Cloud & AI Control Environment Assessment | Regulatory & Compliance Systems (FRB, FINRA, SEC) | AI & GenAI Platforms (RAG, Agentic AI) | Event-Driven Systems (Kafka) | Risk Platform Transformation | Distributed Systems & High-Availability Design | Data Engineering (Spark, Databricks, ETL/ELT) | Trading & Risk Platforms | Executive Stakeholder Communication | Platform Modernization | Global Team Leadership

## PROFESSIONAL EXPERIENCE

---

### **Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)**

- Ensured regulatory compliance (FRB, FINRA, SEC) across mission-critical cloud-native systems supporting **\$1T+ daily processing**, directly engaging with control frameworks and audit-readiness requirements
- Modernized legacy systems into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), assessing and strengthening control environments throughout each migration phase
- Implemented AI-assisted development workflows and ML-based anomaly detection, evaluating associated risks and operational controls for AI-expanded platforms
- Led enterprise-scale platform transformation across trading and data systems, applying risk-focused evaluation to architecture decisions and technology controls
- Delivered real-time trading, pricing, and risk platforms improving throughput by **40%**, maintaining high-availability standards (**99.97% uptime**) through rigorous platform governance

- Built and led global engineering teams (**30+ across US/UK/India**) driving **15% velocity improvement** while maintaining compliance and audit standards across jurisdictions

#### **Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)**

- Led consolidation of risk systems contributing to **~\$2B capital efficiency**, applying control assessments and risk-focused analysis across structured products and mortgage trading platforms
- Built real-time pricing and analytics platforms for structured products and mortgage trading, ensuring control adequacy across high-risk financial systems
- Engaged with regulatory and compliance requirements governing structured product platforms, supporting audit-readiness and internal control standards

#### **Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)**

- Architected and delivered end-to-end Java EE trading support applications with embedded compliance and control considerations
- Introduced CI/CD practices reducing release cycle from monthly to weekly, strengthening deployment controls and change management processes

#### **Senior Programmer Analyst — Knight Trading (2004)**

#### **DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)**

#### **Sr. Java Web Developer — Mellon Investor Services (2001)**

#### **Sr. Java GUI Developer — Thomson Financials (2001)**

#### **Sr. Java GUI Developer — Icor Brokerage (2000)**

### **AI & INNOVATION**

---

- Building GenAI platforms (RAG pipelines, agentic AI systems) with applied focus on control environments, risk assessment, and governance for AI-expanded systems
- Applied ML for anomaly detection and operational intelligence, evaluating model risk and control adequacy in production environments
- Driving AI-assisted SDLC workflows improving delivery speed and quality while maintaining audit-aligned change management standards

### **EDUCATION**

---

**Bachelor of Technology** — Anna University

### **SKILLS**

---

**Risk & Compliance:** Regulatory compliance (FRB, FINRA, SEC), SOX, cloud control environment assessment, audit-readiness, risk-focused platform governance, ITIL

**Architecture:** Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime) **AI &**

**Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python,

Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Leadership &**

**Management:** Executive stakeholder management, global team leadership, strategic planning, program management, SDLC, Agile **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft
