Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

Strategic technology executive with 17+ years driving large-scale platform transformation and bottom-line impact across capital markets and enterprise systems at Bank of America. Proven ability to apply analytical rigor and strategic thinking to complex technology challenges, partnering with world-class engineering and business teams to develop, test, and execute strategies that deliver measurable outcomes. Combines deep expertise in cloud-native architecture, AI-enabled platforms, and data engineering with executive stakeholder leadership to accelerate innovation and continuous learning across global organizations. Recognized for building high-performing teams, owning P&L accountability, and translating technology strategy into competitive advantage.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Technology Strategy & Strategic Planning | Executive Stakeholder Leadership | AI & GenAI Platforms (RAG, Agentic AI) | Cloud-Native Architecture (AWS, Kubernetes) | Analytical Problem Solving & Bottom-Line Impact | Global Team Leadership & Talent Development | Platform Modernization & Innovation | Event-Driven Systems (Kafka) | Data Engineering (Spark, Databricks, ETL/ELT) | Regulatory & Compliance Systems | Agile Delivery & Continuous Learning | P&L Ownership & Program Management

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Applied strategic and analytical skills to enterprise-scale platform transformation, delivering measurable bottom-line impact across trading and data systems supporting **\$1T+ daily processing**
- Developed and tested technology strategies in collaboration with world-class engineering and business stakeholders, driving **40% throughput improvement** and **30% cost reduction**
- Led strategic planning and execution for modernization of legacy systems into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), enabling continuous innovation
- Built and led global engineering teams (**30+ across US/UK/India**), fostering a collaborative environment that promoted continuous learning and rewarded innovation with **15% velocity improvement**
- Implemented AI-assisted development workflows and ML-based anomaly detection, accelerating delivery speed and quality across the SDLC

- Drove technology strategy for real-time trading, pricing, and risk platforms, translating complex challenges into scalable, high-availability solutions (**99.97% uptime**)
- Ensured regulatory compliance (FRB, FINRA, SEC) across mission-critical systems, partnering with risk and compliance stakeholders to align technology strategy with enterprise governance

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Developed and executed technology strategy for consolidation of risk systems, contributing to **~\$2B capital efficiency** and significant bottom-line impact
- Built real-time pricing and analytics platforms for structured products and mortgage trading, applying analytical rigor to complex financial technology challenges
- Partnered with business and technology leaders to align platform strategy with organizational priorities and regulatory requirements

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications, driving strategic improvements to platform reliability and operational efficiency
- Introduced CI/CD practices reducing release cycle from monthly to weekly, promoting continuous learning and delivery innovation across engineering teams

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world applications, driving strategic innovation and competitive differentiation
- Applied ML for anomaly detection and operational intelligence, translating analytical insights into bottom-line improvements
- Driving AI-assisted SDLC workflows improving delivery speed and quality, enabling continuous learning and engineering productivity

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Technology strategy, executive stakeholder management, global team leadership (30+ engineers), P&L ownership, strategic planning, analytical problem solving, program management, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance, continuous learning culture **Architecture:** Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime) **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
