

ARUN ARUNACHALAM

Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

Engineering leader with 17+ years driving platform modernization and change management across mission-critical, high-availability systems in highly regulated environments. Proven track record building and scaling core application platforms — from legacy infrastructure to cloud-native, event-driven architectures — while leading global engineering teams and delivering measurable business outcomes. Experienced in bringing modern software engineering practices (CI/CD, Agile, version control, automated release pipelines) to complex operational environments where reliability and compliance are non-negotiable. Combines deep distributed systems expertise with hands-on AI and GenAI capability to accelerate platform delivery and enable intelligent engineering workflows.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Platform Modernization & Core Application Development | Change Management & Version Control Systems | CI/CD & Modern Software Engineering Practices | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | High-Availability & Mission-Critical Platform Engineering | Global Engineering Team Leadership | AI & GenAI Platforms (RAG, Agentic AI) | Data Engineering (Spark, Databricks, ETL/ELT) | Regulatory & Compliance Systems | Executive Stakeholder Leadership

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Modernized legacy systems into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), delivering core application platforms supporting **\$1T+ daily processing**
- Led enterprise-scale platform transformation across trading and data systems, scaling from 10 to **50+ systems** with **99.97% uptime** in mission-critical, compliance-driven environments
- Implemented AI-assisted development workflows and ML-based anomaly detection, improving delivery speed and operational intelligence across the engineering organization
- Delivered real-time trading, pricing, and risk platforms improving throughput by **40%** through architectural modernization and engineering best practices
- Built and led global engineering teams (**30+ across US/UK/India**), driving **15% velocity improvement** through Agile practices, tooling standardization, and SDLC discipline
- Ensured regulatory compliance (FRB, FINRA, SEC) across mission-critical systems, maintaining platform reliability in environments with direct operational consequences

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Built real-time pricing and analytics platforms for structured products and mortgage trading, delivering core application capabilities for high-stakes operational environments
- Led consolidation of risk systems contributing to ~\$2B capital efficiency, requiring rigorous change management and version-controlled release practices across distributed teams

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications serving mission-critical desk operations
- Introduced CI/CD practices reducing release cycle from monthly to weekly — bringing modern software engineering discipline to an environment previously underserved by automated tooling

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world engineering and operational applications
- Applied ML for anomaly detection and operational intelligence across mission-critical platform environments
- Driving AI-assisted SDLC workflows improving delivery speed, code quality, and engineering team productivity

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Engineering team leadership (30+ engineers across US/UK/India), executive stakeholder management, P&L ownership, strategic planning, program management, Agile, SDLC, ITIL, SOX, FRB/FINRA/SEC compliance

Platform & Architecture: Core application platform development, cloud-native architecture (AWS, Kubernetes), event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime), enterprise architecture, platform modernization

Change Management & DevOps: CI/CD pipeline design and implementation, version control practices, automated release management, change management across mission-critical environments

AI & Data: GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB

Engineering: Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS

Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
