

ARUN ARUNACHALAM

Jersey City, NJ | 908-330-1050 | asnarun75@gmail.com | linkedin.com/in/arunarunachalam75

PROFESSIONAL SUMMARY

Seasoned Technology Executive with 17+ years leading large-scale broadcast and enterprise platform operations, infrastructure planning, and engineering team leadership across mission-critical, high-availability environments. Proven track record overseeing day-to-day technology operations, driving systems reliability, and executing complex technical workflows at enterprise scale. Combines deep expertise in operational execution, distributed systems, and cloud-native infrastructure with a collaborative leadership style that aligns global engineering teams to business outcomes. Experienced managing regulatory compliance, vendor relationships, and strategic infrastructure modernization initiatives in fast-paced, 24/7 operational environments.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Broadcast & Enterprise Technology Operations | Infrastructure Planning & Systems Reliability | Technical Workflow Execution | Global Engineering Team Leadership | High-Availability Platform Management (99.97% uptime) | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | Operational Execution & Day-to-Day Oversight | Regulatory & Compliance Systems (FRB, FINRA, SEC) | Executive Stakeholder Leadership | AI & GenAI Platforms (RAG, Agentic AI) | Data Engineering (Spark, Databricks, ETL/ELT) | Platform Modernization | Agile / SDLC / ITIL

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Served as senior technology operations leader overseeing day-to-day engineering support and infrastructure reliability across mission-critical platforms supporting **\$1T+ daily processing**
- Directed infrastructure planning initiatives modernizing legacy systems into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), ensuring continuous operational uptime of **99.97%**
- Led technical workflow execution and operational delivery across real-time trading, pricing, and risk platforms, improving system throughput by **40%**
- Built, managed, and mentored global engineering teams (**30+ engineers across US/UK/India**), driving **15% velocity improvement** through collaborative leadership and structured team development
- Oversaw engineering support functions and ensured regulatory compliance (FRB, FINRA, SEC) across all mission-critical, 24/7 operational systems

- Implemented AI-assisted development workflows and ML-based anomaly detection to improve operational intelligence and systems reliability
- Managed cross-functional stakeholder relationships across technology, operations, and executive leadership to align infrastructure planning with business priorities

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation and operational stabilization of risk systems contributing to **~\$2B capital efficiency**
- Oversaw technical execution and infrastructure reliability for real-time pricing and analytics platforms supporting structured products and mortgage trading operations
- Managed engineering support teams and coordinated technical workflows across multiple business-critical systems

Bank of America — AVP, Whole Loan Trading Desk Support (*prior to 2011*)

- Architected and delivered end-to-end Java EE trading support applications, ensuring operational reliability for front-office trading workflows
- Introduced CI/CD practices reducing release cycle from monthly to weekly, improving operational execution and deployment reliability

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) to enhance operational intelligence and workflow automation
- Applied ML for anomaly detection and operational monitoring across high-availability infrastructure
- Driving AI-assisted SDLC workflows improving delivery speed, quality, and engineering team productivity

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, global engineering team leadership (30+ engineers), operational execution, infrastructure planning, P&L ownership, strategic planning, program management, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance **Operations & Architecture:** High-availability platform operations (99.97% uptime), cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, broadcast and enterprise technology operations **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
