PROFESSIONAL SUMMARY

Senior technology executive with 17+ years of end-to-end build-and-run ownership of mission-critical platforms across capital markets and post-trade operations at Bank of America, with a proven record of leading global engineering organizations through large-scale platform transformation. Deep expertise in AI automation platforms, workflow and task orchestration, case management systems, and event-driven architecture positions me to drive the next generation of post-trade operations technology. Combines hands-on experience delivering GenAI solutions — including RAG pipelines and agentic AI systems — with executive stakeholder leadership across regulatory, compliance, and operations domains. Demonstrated ability to scale global engineering teams, accelerate AI-assisted delivery, and translate complex technology investments into measurable business outcomes within Corporate and Investment Bank environments.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

AI Automation Platforms (RAG, Agentic AI) | Workflow & Task Orchestration | Case Management Systems | Post-Trade & Operations Technology | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | Global Engineering Leadership | End-to-End Build-and-Run Ownership | Data Engineering (Spark, Databricks, ETL/ELT) | Trading & Risk Platforms | Executive Stakeholder Leadership | Regulatory & Compliance Systems (FRB, FINRA, SEC)

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Held end-to-end build-and-run ownership of enterprise-scale trading, risk, and operations platforms supporting **\$1T+ daily processing**
- Architected and delivered AI automation platforms including ML-based anomaly detection and AI-assisted SDLC workflows, achieving **35% faster delivery** and **45% productivity gain**
- Built and led global engineering organization of **30+ engineers across US/UK/India**, driving cross-functional delivery and **15% velocity improvement**
- Modernized legacy systems into cloud-native, event-driven architecture leveraging AWS, Kafka, and Kubernetes — improving platform throughput by **40%**
- Delivered real-time workflow orchestration, pricing, and risk platforms across capital markets operations

- Ensured regulatory compliance (FRB, FINRA, SEC) across mission-critical, high-availability systems operating at **99.97% uptime**
- Partnered with executive stakeholders across trading, risk, and operations to align technology strategy with business outcomes

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation of post-trade risk and operations systems contributing to **~\$2B capital efficiency**
- Built real-time pricing, analytics, and workflow platforms supporting structured products and mortgage trading operations
- Drove automation initiatives across trade lifecycle and operations case management processes

Bank of America — AVP, Whole Loan Trading Desk Support (*prior to 2011*)

- Architected and delivered end-to-end Java EE trading support and operations applications
- Introduced CI/CD practices reducing release cycle from monthly to weekly, accelerating build-and-run delivery cadence

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI automation platforms leveraging RAG pipelines and agentic AI systems for real-world financial services applications
- Applied ML for anomaly detection and operational intelligence across post-trade and risk workflows
- Driving AI-assisted SDLC workflows that improve engineering delivery speed, quality, and team productivity at scale

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Global engineering organization leadership (30+ engineers across US/UK/India), end-to-end build-and-run ownership, executive stakeholder management, P&L ownership, strategic planning, program management, Agile, SDLC, ITIL, SOX, FRB/FINRA/SEC compliance

Architecture: Cloud-native architecture (AWS, Kubernetes), event-driven systems (Kafka), workflow and task orchestration, distributed systems, enterprise architecture, high-availability platforms (99.97% uptime)

AI & Automation: GenAI automation platforms (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, operations intelligence, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB

Engineering: Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS

Tools: ServiceNow, JIRA, Git, Visio, Microsoft Project
