PROFESSIONAL SUMMARY

Senior Technology Resiliency Executive with 17+ years designing and embedding enterprise-wide resiliency strategies across mission-critical platforms, applications, and infrastructure within global financial institutions. Proven track record of architecting high-availability, fault-tolerant, cloud-native systems supporting \$1T+ daily processing with 99.97% uptime across capital markets and trading environments. Deep expertise in resiliency engineering, platform modernization, and operating model transformation — partnering across engineering, risk, and executive stakeholders to define how technology operates at scale. Combines hands-on distributed systems architecture with AI-enabled operational intelligence to drive continuous resilience improvement across global platforms.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

High-Availability & Resiliency Architecture (99.97% Uptime) | Enterprise-Wide Resiliency Strategy & Governance | Cloud-Native Platform Engineering (AWS, Kubernetes) | Event-Driven & Distributed Systems (Kafka) | Platform Modernization & Operating Model Transformation | Trading & Risk Platform Reliability | AI & ML-Based Anomaly Detection & Operational Intelligence | Regulatory & Compliance Frameworks (FRB, FINRA, SEC, SOX) | Global Engineering Team Leadership | Executive Stakeholder Engagement | Data Engineering (Spark, Databricks, ETL/ELT)

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Designed and embedded enterprise-wide resiliency strategies across trading and data platforms supporting **\$1T+ daily processing**, achieving **99.97% uptime** across 50+ mission-critical systems
- Architected cloud-native, event-driven infrastructure (AWS, Kafka, Kubernetes) to eliminate single points of failure and ensure continuous availability across capital markets applications
- Delivered real-time trading, pricing, and risk platforms with **40% throughput improvement**, directly improving platform reliability and operational resilience
- Implemented ML-based anomaly detection and AI-assisted operational intelligence to proactively identify and mitigate resiliency risks before business impact
- Defined and enforced resiliency operating models and engineering standards across global teams (**30+ engineers across US/UK/India**), driving **15% velocity improvement**

- Partnered with executive stakeholders and risk leadership to align resiliency strategy with regulatory requirements (FRB, FINRA, SEC), ensuring compliance across mission-critical systems
- Led platform modernization of legacy infrastructure into fault-tolerant, distributed architectures, reducing systemic risk and improving recovery posture across the enterprise

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led consolidation and re-architecture of risk systems, improving platform stability and contributing to **~\$2B capital efficiency**
- Built real-time pricing and analytics platforms for structured products and mortgage trading with high-availability design principles embedded from inception

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications with resilient, fault-tolerant design patterns
- Introduced CI/CD practices reducing release cycle from monthly to weekly, improving deployment reliability and reducing change-related incidents

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) to enhance operational intelligence and resiliency decision-making
- Applied ML for anomaly detection and proactive operational risk identification across large-scale distributed platforms
- Driving AI-assisted SDLC workflows to improve delivery reliability, quality, and resiliency engineering velocity

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Executive stakeholder management, global team leadership (30+ engineers), resiliency operating model design, strategic planning, program management, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance **Resiliency & Architecture:** High-availability platform engineering (99.97% uptime), fault-tolerant distributed systems, cloud-native architecture (AWS, Kubernetes), event-driven systems (Kafka), enterprise resiliency strategy, platform modernization, disaster recovery, operational risk reduction **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted operational intelligence, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
