PROFESSIONAL SUMMARY

Technology executive with 17+ years driving large-scale digital transformation and enterprise platform modernization across capital markets and financial services at Bank of America. Proven strategic partner to senior business stakeholders, translating complex technology investments into measurable business outcomes — including 40% performance gains, 30% cost reduction, and ~\$2B capital efficiency. Deep expertise spanning cloud-native architecture, AI/GenAI platforms, event-driven systems, and data engineering, with a track record of leading global engineering organizations and delivering mission-critical solutions in highly regulated financial environments. Combines executive-level strategic vision with hands-on technical depth to position financial services organizations for a digital future.

SIGNATURE IMPACT

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

CORE CAPABILITIES

Strategic Technology Leadership & Digital Transformation | AI & GenAI Platforms (RAG, Agentic AI) | Financial Services & Capital Markets Expertise | Cloud-Native Architecture (AWS, Kubernetes) | Event-Driven Systems (Kafka) | Executive Stakeholder Partnership | Trading, Risk & Regulatory Platforms | Data Engineering (Spark, Databricks, ETL/ELT) | Global Team Leadership | Platform Modernization | Regulatory & Compliance Systems (FRB, FINRA, SEC)

PROFESSIONAL EXPERIENCE

Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)

- Served as strategic technology leader for enterprise-scale platform transformation across trading and data systems supporting **\$1T+ daily processing**, partnering directly with executive business stakeholders to align technology roadmaps with financial services business objectives
- Drove end-to-end digital transformation of legacy infrastructure into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), delivering measurable business outcomes including **40% throughput improvement** and **30% cost reduction**
- Modernized real-time trading, pricing, and risk platforms, enabling faster time-to-market and improved operational resilience across capital markets business lines
- Implemented AI-assisted development workflows and ML-based anomaly detection, accelerating delivery velocity by **35%** and improving platform intelligence
- Built and led global engineering organizations (**30+ engineers across US/UK/India**), establishing high-performance delivery culture and driving **15% velocity improvement**
- Ensured regulatory compliance (FRB, FINRA, SEC) across mission-critical financial systems, managing risk and governance at enterprise scale

- Scaled platform ecosystem from 10 to **50+ systems** while maintaining **99.97% uptime** across production environments

Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)

- Led technology strategy and delivery for structured products and mortgage trading platforms, contributing to **~\$2B capital efficiency** through risk system consolidation
- Built real-time pricing and analytics platforms for structured products and mortgage trading, enabling business growth and improved risk visibility
- Partnered with front-office trading and risk stakeholders to translate complex business requirements into scalable, high-performance technology solutions

Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)

- Architected and delivered end-to-end Java EE trading support applications for the whole loan trading desk
- Introduced CI/CD practices that reduced release cycle from monthly to weekly, accelerating business responsiveness

Senior Programmer Analyst — Knight Trading (2004)

DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)

Sr. Java Web Developer — Mellon Investor Services (2001)

Sr. Java GUI Developer — Thomson Financials (2001)

Sr. Java GUI Developer — Icor Brokerage (2000)

AI & INNOVATION

- Building GenAI platforms (RAG pipelines, agentic AI systems) for real-world financial services applications
- Applied ML for anomaly detection and operational intelligence across capital markets platforms
- Driving AI-assisted SDLC workflows improving delivery speed, quality, and engineering productivity

EDUCATION

Bachelor of Technology — Anna University

SKILLS

Leadership: Strategic technology leadership, executive stakeholder management, digital transformation, global team leadership (30+ engineers), P&L ownership, strategic planning, program management, SDLC, Agile, ITIL, SOX, FRB/FINRA/SEC compliance **Architecture:** Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime), platform modernization **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
