---

## PROFESSIONAL SUMMARY

---

Technology executive with 17+ years of experience driving large-scale platform transformation, quality engineering, and regulatory compliance across mission-critical enterprise systems in financial services. Proven track record delivering cloud-native, AI-enabled platforms with measurable improvements in performance, reliability, and operational quality — including 99.97% uptime across 50+ systems supporting \$1T+ daily processing. Combines deep expertise in distributed systems architecture, data engineering, and AI-assisted SDLC workflows with a disciplined focus on compliance, process excellence, and continuous improvement. Adept at aligning technology quality strategy with business outcomes and executive stakeholder priorities across global, matrixed organizations.

## SIGNATURE IMPACT

---

- **\$8M** enterprise transformation → **40% performance improvement, 30% cost reduction**
- **AI-assisted engineering** → **35% faster delivery, 45% productivity gain**
- Scaled platforms from 10 to **50+ systems** with **99.97% uptime**
- Enabled **~\$2B capital efficiency** via risk platform transformation

## CORE CAPABILITIES

---

Platform Quality & Reliability Engineering | Regulatory & Compliance Systems (FRB, FINRA, SEC, SOX) | Cloud-Native Architecture (AWS, Kubernetes) | AI & GenAI Platforms (RAG, Agentic AI) | Event-Driven Systems (Kafka) | Data Engineering (Spark, Databricks, ETL/ELT) | Process Excellence & Continuous Improvement | Executive Stakeholder Leadership | Global Team Leadership | Trading & Risk Platforms | Platform Modernization | Agile & SDLC Governance

## PROFESSIONAL EXPERIENCE

---

### **Bank of America — Director, Global Risk & Capital Markets Technology (2015 - Present)**

- Ensured regulatory compliance (FRB, FINRA, SEC) across mission-critical trading and risk platforms, maintaining operational standards aligned with enterprise and regulatory quality requirements
- Delivered real-time trading, pricing, and risk platforms with **99.97% uptime** across **50+ systems**, improving throughput by **40%** through disciplined engineering and quality practices
- Led enterprise-scale platform transformation across trading and data systems supporting **\$1T+ daily processing**, driving measurable performance and reliability improvements
- Modernized legacy systems into cloud-native, event-driven architecture (AWS, Kafka, Kubernetes), embedding quality and resilience at the architectural level
- Implemented AI-assisted development workflows and ML-based anomaly detection to improve delivery quality, reduce defect rates, and accelerate SDLC velocity
- Built and led global engineering teams (**30+ across US/UK/India**), driving **15% velocity improvement** through process standardization and continuous improvement initiatives

- Managed P&L and strategic planning for enterprise transformation programs, aligning technology quality investments with measurable business outcomes

#### **Bank of America — VP, Structured Products & Mortgage Technology (2011 - 2015)**

- Led consolidation of risk systems contributing to ~\$2B capital efficiency, ensuring data integrity and platform quality across complex structured products environments
- Built real-time pricing and analytics platforms for structured products and mortgage trading, establishing reliability and compliance standards across the technology stack

#### **Bank of America — AVP, Whole Loan Trading Desk Support (prior to 2011)**

- Architected and delivered end-to-end Java EE trading support applications with a focus on stability, maintainability, and compliance with enterprise standards
- Introduced CI/CD practices reducing release cycle from monthly to weekly, improving deployment quality and reducing production risk

#### **Senior Programmer Analyst — Knight Trading (2004)**

#### **DB2 / WebSphere Administrator & Sr. Java Developer — Kyocera Mita (2003)**

#### **Sr. Java Web Developer — Mellon Investor Services (2001)**

#### **Sr. Java GUI Developer — Thomson Financials (2001)**

#### **Sr. Java GUI Developer — Icor Brokerage (2000)**

### **AI & INNOVATION**

---

- Building GenAI platforms (RAG pipelines, agentic AI systems) to enhance operational intelligence and quality monitoring across enterprise systems
- Applied ML for anomaly detection and operational intelligence, enabling proactive identification of quality and reliability issues
- Driving AI-assisted SDLC workflows improving delivery speed, defect detection, and overall engineering quality

### **EDUCATION**

---

#### **Bachelor of Technology — Anna University**

### **SKILLS**

---

**Leadership:** Executive stakeholder management, global team leadership, P&L ownership, strategic planning, program management, SDLC governance, Agile, ITIL, SOX, FRB/FINRA/SEC compliance, process excellence, continuous improvement **Architecture:** Cloud-native architecture (AWS, Kubernetes), enterprise architecture, event-driven systems (Kafka), distributed systems, high-availability platforms (99.97% uptime) **AI & Data:** GenAI (RAG pipelines, agentic AI), ML anomaly detection, AI-assisted SDLC, Spark, Databricks, ETL/ELT, Snowflake, Hadoop, Cassandra, MongoDB **Engineering:** Java, Python, Node.js, SQL, Oracle, Sybase, REST/SOA, WebLogic, Kafka, Kubernetes, AWS **Tools:** ServiceNow, JIRA, Git, Visio, Microsoft Project
